CASE NO.

**COMPLAINT—CLASS ACTION
FOR DECLARATORY AND
INJUNCTIVE RELIEF AND
PETITION FOR WRIT OF
HABEAS CORPUS**

Immediate Relief Requested

I.

INTRODUCTION

1. One week ago today, Scott Cutting became the seventh incarcerated person to die due to complications from coronavirus at FCI Terminal Island.¹ Despite being 70 years old, having preexisting conditions, and showing symptoms for days, he was not tested for coronavirus until his symptoms were so severe that he had to be placed on a ventilator. He was serving a 26-month sentence when he died.

2. On Wednesday, May 13, 2020, James Lino, became the eighth incarcerated person to die due to complications from coronavirus at Terminal Island.² He was at Terminal Island in part due to his long-term preexisting conditions. Lino was 65 years old and serving a 34-month sentence when he died.

3. It was precisely in anticipation of cases like those of Mr. Cutting and Mr. Lino that Congress modified 18 U.S.C. § 3624(c) under Section 12003(b)(2) of the Coronavirus Aid, Relief, and Economic Security (“CARES”) Act to broaden the Federal Bureau of Prison’s (“BOP”) discretion to allow home confinement during the COVID-19 emergency period. While BOP previously could only authorize home confinement for those who had the shorter of 6 months or 10% of their sentences left to serve, the CARES Act removed those limitations and allows the BOP to authorize home confinement for any amount of time within its discretion. After having initially provided a list of criteria for BOP to consider when releasing prisoners into home confinement, Attorney General William Barr issued a second

¹ *Nearly 70% of Terminal Island inmates test positive for coronavirus as 7th inmate dies*, Daily Breeze, May 9, 2020, <https://www.dailybreeze.com/2020/05/09/nearly-70-of-terminal-island-inmates-test-positive-for-coronavirus-as-7th-inmate-dies/>

² *8th inmate dies of coronavirus at Terminal Island federal prison*, Daily Breeze, May 13, 2020, <https://www.dailybreeze.com/2020/05/13/8th-inmate-dies-of-coronavirus-at-terminal-island-federal-prison/>

1 memo on April 3, 2020, weeks before Mr. Cutting and Mr. Lino died, urging the
 2 BOP to immediately transfer medically “at-risk” prisoners to home confinement,
 3 especially at facilities where “COVID-19 is materially affecting operations.”³ Under
 4 that criteria, Mr. Cutting and Mr. Lino, both of whom were 65 or older and had pre-
 5 existing health conditions, should have been on the shortlist for home confinement.
 6 But the BOP and Terminal Island did not release them.

7 4. This petition is not brought by Mr. Cutting or Mr. Lino, who have died.
 8 This petition is brought by Plaintiff-Petitioner Lance Aaron Wilson, Plaintiff-
 9 Petitioner Maurice Smith, and Plaintiff-Petitioner Edgar Vasquez (collectively,
 10 “Petitioners”) on behalf of themselves and a class of all medically vulnerable
 11 persons incarcerated at Terminal Island now and in the future, who are all still alive
 12 and incarcerated at Terminal Island and seek to avoid Mr. Cutting and Mr. Lino’s
 13 fate.

14 5. Terminal Island is a low-security correctional institution within the
 15 BOP that is supposed to specialize in housing prisoners who need long-term medical
 16 or mental health care.⁴ Terminal Island houses some of most vulnerable—and least
 17 dangerous—people serving time caught in the federal prison system. The cruel irony
 18 is that many of the people currently imprisoned in Terminal Island were sent there
 19 *because* they have serious medical conditions. They were sent to Terminal Island to
 20 get access to superior medical care—but instead, they are now housed in one of the
 21

 25 *Memorandum for Director of Bureau of Prisons*, Office of the Attorney General,
 26 Washington, D.C. (April 3, 2020) *available at*
 27 https://www.bop.gov/coronavirus/docs/bop_memo_home_confinement_april3.pdf

28 ⁴ Jeremiah Dobruck, *Man serving 26 months for tax fraud is 7th Terminal Island inmate to die*, LONG BEACH POST NEWS, May 10, 2020, *available at*
<https://lbpost.com/news/terminal-island-inmate-dies-7th-700>

1 deadliest facilities in the BOP. Given the overwhelming number of people infected,
2 it is impossible for Terminal Island to provide proper medical treatment. At least
3 eight people incarcerated at Terminal Island have already died from complications
4 related to the coronavirus.

5 6. Just a week ago, Terminal Island was the site of the largest COVID-19
6 outbreak at a BOP facility, reporting over 700 positive cases (693 prisoners and 15
7 staff) as recently as May 11, 2020. By May 15, the number of prisoners
8 mysteriously dropped to 129, with 569 prisoners now being categorized as suddenly
9 being “recovered.” As of the morning of May 15, 2020, when accounting for both
10 prisoners who are being reported as “positive” and those being reported as
11 “recovered,” BOP reports a total of 697 out of the 1,042 individuals incarcerated at
12 Terminal Island as having recently tested positive for coronavirus—more than every
13 state prison in California combined.⁵

14 7. The Court must intervene to prevent Terminal Island from becoming
15 the site of a national tragedy. Respondents Michael Carvajal, the Director of the
16 BOP, and Felicia L. Ponce, the Warden of Terminal Island, have demonstrated that
17 they cannot or will not take the measures necessary to prevent the coronavirus from
18 converting more prison sentences into death sentences without court intervention.
19 Despite numerous warning signs, and despite demands for answers and action by
20 federal, state, and local politicians, Respondents have completely failed to prevent
21 the deadly coronavirus from spreading rampantly through Terminal Island,
22 including by failing to provide basic supplies like soap and hand sanitizer, refusing
23 to provide adequate personal protective equipment (PPE) to prisoners and staff, and
24 failing to conduct enough testing until it was too late. Most egregiously,

25
26 ⁵ See Federal Bureau of Prisons, COVID-19 Coronavirus,
27 <https://www.bop.gov/coronavirus/> (last accessed May 15, 2020) *compare* California
28 Department of Corrections and Rehabilitation, COVID-19 Preparedness,
<https://www.cdcr.ca.gov/covid19/> (last accessed May 15, 2020).

1 Respondents have refused to exercise the wide discretion given to them by Congress
 2 during this national emergency to release low-risk offenders to home confinement in
 3 order to save lives. Having allowed the majority of Terminal Island prisoners to
 4 contract the virus, Respondents cannot be trusted to provide those who have tested
 5 positive with proper medical treatment or to protect those who remain uninfected
 6 from infection.

7 8. It is clear from the public record that Respondents will not act to meet
 8 the bare minimum requirements of the Constitution unless forced to do so. On
 9 March 21, 2020, BOP reported the first case of a prisoner testing positive for
 10 COVID-19. Although public health officials warned that BOP was walking into a
 11 “disaster waiting to happen[,]” BOP claimed that it was “confident” in its “robust
 12 efforts to keep correctional workers and the inmate population safe and healthy[.]”⁶
 13 A little over a month later, BOP’s own statistics show that this confidence was
 14 sorely misplaced. As of this morning, BOP now reports that 4,170 people
 15 incarcerated in BOP facilities and 562 staff members have tested positive for
 16 COVID-19. 55 people in BOP custody have died.⁷ The spread of COVID-19 within
 17 the enclosed space of federal prisons has now exploded into a veritable outbreak that
 18 threatens the health and safety of not only every person residing therein “but also
 19 corrections officers and prison health-care workers as well as their families and
 20 communities.”⁸

21 _____
 22 ⁶ Kimberly Kindy, Emma Brown, Dalton Bennett, ‘Disaster waiting to happen’:
 23 *Thousands of inmates released as jails and prisons face coronavirus threat*,

 25 https://www.washingtonpost.com/national/disaster-waiting-to-happen-thousands-of-inmates-released-as-jails-face-coronavirus-threat/2020/03/24/761c2d84-6b8c-11ea-b313-df458622c2cc_story.html

26 ⁷ Federal Bureau of Prisons, COVID-19 Coronavirus,
 27 <https://www.bop.gov/coronavirus/>

28 ⁸ *Kindy, et al., supra.*

1 9. The Warden’s claims that the outbreak is under control ring hollow.
 2 Those imprisoned inside Terminal Island report being crammed into communal
 3 living areas with less than 2-3 feet of space between bunks. The BOP denied
 4 requests from staff for PPE because it could “scare the inmates.”⁹ Sick prisoners
 5 have been released from medical care prematurely, only to collapse again. Other
 6 prisoners who have tested positive and have symptoms have received no medical
 7 care at all—they are not being appropriately monitored and they have not even been
 8 able to speak with a doctor about how they are feeling, how bad their symptoms are
 9 likely to become or what their treatment options are. The grim results speak for
 10 themselves. Over half the inmate population have been infected. People have died,
 11 and more are dying.

12 10. COVID-19 has changed the way we live our lives, almost overnight. In
 13 California, since March 19, 2020, Governor Gavin Newsom has imposed an order
 14 for all California residents to stay at home except to address essential needs.¹⁰
 15 Citizens in every state and almost every country in the world are accepting
 16 unprecedented disruptions to their everyday lives in order to minimize human
 17 contact through social distancing and to ensure that governments are able to test,
 18 track, treat, and isolate those infected with COVID-19.

19 11. The same practices that are saving lives across the world, however, are
 20 simply not possible for the 1,000+ people trapped inside of Terminal Island. Packed
 21 into the confines of their shared dormitories, those imprisoned in Terminal Island
 22 spend almost every moment of every day within arms-length of another person—
 23

 28 [inmate-families-protest-prison-conditions-after-5-die-from-coronavirus/](https://losangeles.cbslocal.com/2020/05/01/goldstein-investigates-terminal-island-inmate-families-protest-prison-conditions-after-5-die-from-coronavirus/)

¹⁰ California Coronavirus (COVID-19) Response, Stay home except for essential
 needs, <https://covid19.ca.gov/stay-home-except-for-essential-needs/>

1 whether it be while standing in pill lines, taking meals, or even when sleeping. The
 2 Prison has been unable to effectively isolate infected individuals from the general
 3 population. The Prison did not issue masks to its inmates until the end of April, and
 4 prisoners were forced to reuse those masks for at least a week.

5 12. Far from learning from its missteps at Terminal Island, the BOP
 6 continues to demonstrate a callous disregard for reality, claiming on a recent staff-
 7 wide call, without basis, that the shocking number of positive cases at facilities such
 8 as Terminal Island are “in no way representative of the positive rate across the
 9 agency.”¹¹ Having only recently increased testing due to mounting political
 10 pressure, Respondents are now overwhelmed and have no plan to control or contain
 11 the outbreak at Terminal Island or to treat the hundreds of prisoners who have now
 12 contracted the virus. Petitioners cannot afford to wait and see if Respondents will
 13 handle the treatment of coronavirus better than they handled the prevention of its
 14 spread. Unless immediate action is taken to ensure that Terminal Island provides
 15 proper medical care to those infected and implements measures to protect those who
 16 are not yet infected, including by reducing the size of the incarcerated population,
 17 soon, substantially all incarcerated people at Terminal Island—many of whom are
 18 especially vulnerable due to underlying medical conditions—will be infected with
 19 COVID-19. Some will die. Dr. Shamsher Samra, a noted physician with ample
 20 experience working with incarcerated individuals, delivers an urgent warning: “BOP
 21 should take *immediate steps* to dramatically downsize the population at Terminal
 22 Island, with priority given to those at high risk of harm due to their age and health
 23 status and thus are likely to require a disproportionate amount of medical
 24 resources.”¹²

25
 26 ¹¹ *Federal Bureau of Prisons*, Director M.D. Carvajal Addresses All Staff (May 6,
 2020), https://www.bop.gov/resources/news/20200506_dir_message.jsp

27 ¹² Exhibit 5 (“Exh. 5,” Declaration of Shamsher Samra, M.D.) ¶ 20 (emphasis
 28 added); accord Exhibit 6 (“Exh. 6,” Declaration of Marc Stern, M.D.) ¶ 17.

1 that letter, Petitioner Wilson informed his family that he had tested positive for
 2 COVID-19, and was experiencing symptoms including migraines, body chills, and
 3 sweating in his sleep. Since then, he has not been given any treatment, nor has he
 4 been able to see a doctor. Petitioner Wilson submitted an application for
 5 Compassionate Release and/or Home Confinement to Respondent Ponce on April
 6 27, 2020. He has not heard back.

7 17. Plaintiff-Petitioner Maurice Smith (“Petitioner Smith”) is incarcerated
 8 at Terminal Island. He is 50 years old and suffers from asthma, hypertension, and is
 9 also pre-diabetic. After the COVID-19 outbreak began at Terminal Island, Petitioner
 10 Smith was transferred to a makeshift living space in an old UNICOR warehouse,
 11 infested with vermin and without potable water, hot water for showers, or heating.
 12 Petitioner Smith has raised concerns about the living conditions to prison staff—
 13 including the Warden—but his complaints have fallen on deaf ears. For now, he
 14 simply tries to help as many of the sick prisoners as he can.¹⁴

15 18. Plaintiff-Petitioner Edgar Vasquez (“Petitioner Vasquez”) is
 16 incarcerated at Terminal Island. He is 32 years old. Around the same time as
 17 Petitioner Smith, Petitioner Vasquez was transferred to the warehouse. Due to the
 18 unsanitary conditions, he started feeling sick and became afraid that he had
 19 contracted COVID-19. Despite numerous requests for medical attention, he was
 20 ignored, and was simply told to “hang in there” because his temperature isn’t high
 21 enough.

22 19. Respondent Felicia L. Ponce (“Respondent Ponce,” “Warden Ponce,”
 23 or “Warden”) is the Warden at Terminal Island. As Warden, Respondent Ponce is
 24 responsible for and oversees all day-to-day activity at Terminal Island. She is in
 25 charge of all aspects of the operations and functions of Terminal Island. Her
 26

27 ¹⁴ According to a communication from his wife—Jennifer Van Atta—just a few
 28 hours prior to filing of this Complaint, Petitioner Smith has now tested positive for
 COVID-19.

1 Constitution (Suspension Clause). In addition, the Court has jurisdiction to grant
2 declaratory relief pursuant to the Declaratory Judgment Act, 28 U.S.C. § 2201.

3 Venue is proper in the Central District of California pursuant to 28 U.S.C.
4 § 1391(b)(2) because a substantial part of the events and omissions giving rise to
5 these claims occurred and continues to occur in this district.

6 23. This Court has personal jurisdiction over Warden Ponce because at all
7 times relevant to this action, she has been employed at Terminal Island in Los
8 Angeles County, California, and all the actions and omissions at issue occurred at
9 Terminal Island. This Court has personal jurisdiction over Director Carvajal because
10 at all times relevant to this action, he has set BOP policies and issued guidance that
11 Respondent Ponce has applied at Terminal Island in Los Angeles County,
12 California.

13 IV.

14 **FACTUAL ALLEGATIONS**

15 **A. The COVID-19 Crisis**

16 24. The novel coronavirus that causes COVID-19 has led to a global
17 pandemic. As of May 15, 2020, worldwide there are over 4.3 million reported
18 COVID-19 cases and 297,241 confirmed deaths.¹⁵ In the United States, the case
19 count stands at 1,412,121 and the death count at 85,990.¹⁶ In California, there are
20 currently 74,936 confirmed cases of coronavirus.¹⁷ There are 5,843 individuals who

21 _____

23 <https://www.who.int/emergencies/diseases/novel-coronavirus-2019> (last accessed
May 15, 2020).

24 ¹⁶ Ctrs. for Disease Control & Prevention, Coronavirus Disease 2019 (COVID-19),
25 <https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/cases-in-us.html> (last
accessed May 15, 2020).

26 ¹⁷ California Department of Public Health, COVID-19 Updates,
27 <https://www.cdph.ca.gov/Programs/CID/DCDC/Pages/Immunization/ncov2019.aspx>
28 [x](#) (last accessed May 15, 2020).

1 have been hospitalized with confirmed or suspected cases of coronavirus and 3,108
 2 fatalities.¹⁸ Los Angeles County has been epicenter of the pandemic in California,
 3 with 28,644 cases and 1,367 deaths.¹⁹

4 25. The virus is known to spread from person to person through respiratory
 5 droplets, close personal contact, and from contact with contaminated surfaces and
 6 objects.²⁰ Infected people can spread the virus to others even if they are
 7 asymptomatic, such that simply avoiding people who are coughing or visibly
 8 feverish is insufficient.

9 26. According to the CDC, people who suffer from certain underlying
 10 medical conditions face elevated risk.²¹ Such conditions include chronic lung
 11 disease, moderate to severe asthma, serious heart conditions, hypertension, high
 12 blood pressure, chronic kidney disease, liver disease, diabetes, compromised
 13 immune systems (such as from cancer treatment, HIV, autoimmune disease, or use
 14 of immunosuppressing medication for other conditions), and severe obesity. One
 15 analysis found mortality rates of 13.2% for patients with cardiovascular disease,
 16 9.2% for diabetes, 8.4% for hypertension, 8.0% for chronic respiratory disease, and
 17 7.6% for cancer.²²

18 27. The risk of illness or death from COVID-19 is increased for older
 19

[covid-19-final-report.pdf](https://www.who.int/docs/default-source/coronaviruse/who-china-joint-mission-on-covid-19-final-report.pdf)

1 populations. In a February 29, 2020 preliminary report, individuals age 50-59 had an
 2 overall mortality rate of 1.3%, those age 60-69 had an overall 3.6% mortality rate,
 3 and those age 70-79 had an 8% mortality rate.²³

4 28. In many people, COVID-19 causes fever, cough, and shortness of
 5 breath. But for people over the age of fifty or with medical conditions that increase
 6 the risk of serious COVID-19 infection, shortness of breath can be severe. Most
 7 people in higher-risk categories who develop serious illness will need advanced
 8 support. This level of supportive care requires highly specialized equipment that is
 9 in limited supply, and an entire team of care providers, including 1:1 or 1:2 nurse-to-
 10 patient ratios, respiratory therapists, and intensive-care physicians.²⁴

11 29. In patients who do not die, COVID-19 can severely damage lung tissue,
 12 requiring an extensive period of rehabilitation, and in some cases, can cause a
 13 permanent loss of respiratory capacity. COVID-19 may also target the heart
 14 muscle, causing a medical condition called myocarditis, or inflammation of the
 15 heart muscle. Myocarditis can affect the heart muscle and electrical system,
 16 reducing the heart's ability to pump. This reduction can lead to rapid or abnormal
 17 heart rhythms in the short term, and long-term heart failure that limits exercise
 18 tolerance and the ability to work.²⁵

19 30. Emerging evidence also suggests that COVID-19 can trigger an over-
 20 response of the immune system, further damaging tissues in a cytokine release

 23 Chart, <https://cutt.ly/ytEimUQ> (data analysis based on WHO China Joint Mission
 Report) (last accessed May 15, 2020).

24 ²⁴ See Exh. 5 ¶ 7 (noting that treatment for vulnerable people infected by
 25 COVID-19 may require “significant advanced support” including ventilator
 assistance and intensive care support).

26 ²⁵ Cynthia Weiss, How does COVID-19 affect the heart?, Mayo Clinic News
 27 Network (Apr. 3, 2020), [https://newsnetwork.mayoclinic.org/discussion/how-does-
 28 covid-19-affect-the-heart/](https://newsnetwork.mayoclinic.org/discussion/how-does-covid-19-affect-the-heart/).

1 syndrome that can result in widespread damage to other organs, including
 2 permanent injury to the kidneys and neurologic injury. These complications can
 3 manifest at an alarming pace. Patients can show the first symptoms of infection in as
 4 little as two days after exposure, and their condition can seriously deteriorate in as
 5 little as five days.²⁶

6 31. Even some younger and healthier people who contract COVID-19 may
 7 require supportive care, which includes supplemental oxygen, positive pressure
 8 ventilation, and in extreme cases, extracorporeal mechanical oxygenation.²⁷

9 32. The estimated fatality rate associated with COVID-19 has been
 10 estimated to range from 0.1 to 6 percent, meaning COVID-19 may be as much as 35
 11 times more fatal than seasonal influenza.²⁸ Although many people who contract
 12 COVID-19 will exhibit relatively mild symptoms, the virus will manifest in some
 13 20 percent of cases as a more severe disease requiring “significant medical
 14 intervention.”²⁹

15 33. There is no vaccine against COVID-19 and there is no known
 16 medication to prevent or treat infection from COVID-19. Social distancing, or
 17 remaining physically separated from known or potentially infected individuals, and

1 vigilant hygiene, including frequently and thoroughly washing hands with soap and
 2 water and cleaning and disinfecting high-touch surfaces, are the only known
 3 effective measures for protecting people from COVID-19.³⁰ This is especially
 4 significant because the virus can spread through people who appear asymptomatic.³¹

5 34. State and local officials have been taking aggressive action in
 6 California. On March 4, in response to then-emerging coronavirus outbreak,
 7 Governor Newsom declared a State of Emergency in California,³² doing so even
 8 before the President had declared a national emergency.³³ That same day, the Los
 9 Angeles County Board of Supervisors and Los Angeles County Health Officer
 10 declared a local and public health emergency.³⁴ On March 19, 2020, Governor
 11 Newsom issued Executive Order No. N-22-20 requiring all California residents to
 12 “stay home or at their place of residence” unless the resident works in critical
 13 infrastructure sectors.³⁵

14 35. Local officials have also taken extraordinary measures aimed at
 15 slowing the virus’s spread. For example, on March 19, Los Angeles Mayor issued a

1 movement inherent in correctional facilities makes social distancing and other
 2 preventive measures difficult or impossible. Moreover, the ability of incarcerated
 3 people to adopt preventative measures is completely subject to the dictates of
 4 correctional officials who control the housing, schedules, sanitary supplies, and
 5 nearly every other aspect of their lives.⁴¹

6 37. Correctional facilities increase the risk of rapid spread of an infectious
 7 disease, like COVID-19, because of the high numbers of people with chronic, often
 8 untreated, illnesses housed in a setting with minimal levels of sanitation, limited
 9 access to personal hygiene, limited access to medical care, and no possibility of
 10 staying at a distance from others.⁴²

11 38. The CDC has issued guidance urging prison administrators to take
 12 action to prevent overcrowding of correctional and detention facilities during a
 13 community outbreak.⁴³ The CDC guidance emphasizes that social distancing is
 14 “a cornerstone of reducing transmission of respiratory disease such as
 15

16 Strickler, *Nursing Homes Overwhelmed By Coronavirus*, NBC News (Apr. 1, 2020),
 17 <https://www.nbcnews.com/news/us-news/nursing-homes-overwhelmed-coronavirus-it-impossible-us-stop-spread-n1174171>.

18 ⁴¹ See Exh. 6 ¶ 10 (“Prisons are congregate environments . . . [s]ocial distancing in
 19 ways that are recommended by public health officials can be difficult, if not
 20 impossible[.]”).

21 ⁴² See generally I.A. Binswanger et al., *Prevalence of Chronic Medical Conditions*
 22 *Among Jail and Prison Inmates in the USA Compared With the General Population*,
 23 63 J. Epidemiology & Community Health 912 (2009) (concluding that people
 24 incarcerated in U.S. jails and prisons had a higher burden of most chronic medical
 conditions than the general population, even when adjusting for sociodemographic
 differences and alcohol consumption).

25 ⁴³ U.S. Centers for Disease Control and Prevention, *Interim Guidance on*
 26 *Management of Coronavirus Disease 2019 (COVID-19) in Correctional and*
 27 *Detention Facilities* (CDC Guidance) (Mar. 23, 2020),
 28 <https://www.cdc.gov/coronavirus/2019-ncov/community/correction-detention/guidance-correctional-detention.html>.

1 COVID-19.”⁴⁴ It calls not only for social distancing, but also measures for isolating
 2 and quarantining detainees and staff who have (or are suspected of having) COVID-
 3 19 from those who do not have (or presumably do not have) the virus.

4 39. Many correctional facilities find implementation of these preventive
 5 strategies challenging without a significant reduction in prison populations.

6 40. As a general matter, correctional facilities frequently lack sufficient
 7 medical supplies for the population, and, in times of crisis, medical staff may cease
 8 coming to the facilities. Hot water, soap, and paper towels are often in limited
 9 supply. Incarcerated people themselves, rather than professional cleaners, are often
 10 responsible for cleaning the facilities and often are not given appropriate supplies.
 11 This means there are more people who are susceptible to infection all congregated
 12 together in a location where fighting the spread of an infection is nearly
 13 impossible.⁴⁵

14 41. For these reasons, correctional public health experts have
 15 recommended the release from custody of people most vulnerable to COVID-19.
 16 Exercising authority to enlarge custody to include home confinement or release
 17 detainees protects the people with the greatest vulnerability to COVID-19 from
 18 transmission of the virus, and it also allows for greater risk mitigation for all people
 19 held or working in a prison, jail, or detention center. Release of the most vulnerable
 20 people from custody also reduces the burden on the region’s health-care
 21 infrastructure by reducing the likelihood that an overwhelming number of people
 22 will become seriously ill from COVID-19 at the same time. As Dr. Samra observes:
 23 “BOP should take *immediate steps* to dramatically downsize the population at
 24 Terminal Island, with priority given to those at high risk of harm due to their age
 25 and health status and thus are likely to require a disproportionate amount of medical

resources.”⁴⁶

42. Courts have responded to this urgent call to reduce incarcerated populations. On March 24, 2020, Presiding Judge Kevin C. Brazile of the Superior Court of California, County of Los Angeles, announced an expedited process for the release of individuals jailed while awaiting trial.⁴⁷ By April 13, 2020, the Los Angeles County jail had released 700 individuals.⁴⁸ On May 1, 2020, Judge Brazile announced that a further 250 individuals had been released on their own recognizance pursuant to the Court’s continued efforts “to protect public safety while achieving social distancing inside . . . the jail system.”⁴⁹ Between the onset of COVID-19 and May 13, 2020, Los Angeles lowered its county jail population from 17,076 to 11,813, a reduction of 31%.⁵⁰ High courts in other states have issued similar orders aimed at reducing state prison populations.⁵¹

1 43. Officials in California have echoed the calls to release prisoners and
 2 facilitate social distancing. On March 31, 2020, the California Department of
 3 Corrections and Rehabilitation announced that it would be transitioning nearly 3,500
 4 non-violent inmates to parole or supervised release in order to “mitigate the spread
 5 of COVID-19 . . . [and] increase physical distancing, and assist . . . with isolation
 6 and quarantine efforts for suspected or positive COVID-19 cases[.]”⁵² As of
 7 April 13, all of these individuals had been released.⁵³

8 44. Had Respondents similarly reduced the population at Terminal Island
 9 as called for by the science, the catastrophe we are faced with today may have been
 10 avoided. Because they did not, the outbreak at Terminal Island is now out of control.
 11 This not only poses an unacceptable risk to the health and safety of the incarcerated,
 12 but also burdens local hospitals and thus endangers the broader community.

13 _____
 14 (Pennsylvania Supreme Court ordered the chief judge of all counties to
 15 “immediately” engage in a review of the “current capabilities of their county
 16 correctional institutions . . . to address the spread of COVID-19,” “to ensure that the
 17 county correctional institutions in their districts address the threat of COVID-19,” as
 18 necessary “to identify individuals of incarcerated persons for potential release” and
 19 “to undertake efforts to limit the introduction of new inmates into the county prison
 20 system.”); *Comm. for Pub. Counsel Servs. v. Chief Justice of the Trial Court*, No.

1 Correctional facilities lack adequate medical facilities to treat serious COVID-19
 2 cases, so an outbreak in a prison could overwhelm local hospitals. And as
 3 correctional staff enter and leave the facility, they will carry the virus with them.
 4 Like the incarcerated people in the facilities where they work, correctional officers
 5 face an increased risk of COVID-19 exposure because they are less able to engage
 6 in social distancing and because of the shortage of PPE. Given these dangers, on an
 7 accelerating basis since mid-March of this year, courts in this Circuit and across the
 8 country have ordered the release of prisoners and detainees in response to the
 9 COVID- 19 crisis.⁵⁴

10 45. When the dangers of COVID-19 have reached a level where a prison is
 11 no longer able to incarcerate its population in constitutional conditions, courts have
 12 also granted emergency habeas relief for entire classes of prisoners to be evaluated
 13 for enlargement of custody on an accelerated basis.⁵⁵

14
 15 ⁵⁴ See, e.g., *Arriaga Reyes. v. Decker*, No. 2:20-cv-03600 (D.N.J. Apr. 12, 2020)

 27 Apr. 22, 2020), *appeal filed*, (6th Cir. Apr. 27, 2020) (granting in part emergency
 28 motion and ordering FCI Elkton to evaluate all prisoners for enlargement of
 custody); *Martinez-Brooks v. Easter*, 3-20-cv-00569-MPS, 2020 WL 2405350, at *32

C. Due to Terminal Island's Unique Vulnerability to COVID-19, It Is Not Capable of Adequately Treating Those Infected or Stopping the Spread Without Reducing the Population.

46. Terminal Island's outbreak is the one of the largest of any federal prison, with more infected prisoners than the entire California Department of Corrections and Rehabilitation system combined.⁵⁶ The remarkable size and speed of the Terminal Island outbreak is due to the vulnerability caused by a unique combination of three separate aggravating factors: overcrowding, communal living spaces, and vulnerability of the inmate population.

47. First, Terminal Island is severely overcrowded: as of May 15, 2020, 1,042 inmates occupy a prison with a rated capacity of 779.⁵⁷ This amounts to an overcrowding rate of 133%, higher than the average federal overcrowding rate of 124%.⁵⁸ Even under otherwise ideal conditions, this fact that the prison is already over capacity would render social distancing—a practice that inherently requires that facilities operate at far *under* their usual capacity—extremely difficult if not impossible. Prisons are by nature fertile ground for the spread of COVID-19—

(D. Conn., May 12, 2020) (granting in part temporary restraining order and ordering FCI Danbury to evaluate prisoners with COVID-19 risk factors for home confinement and compassionate release).

⁵⁶ See Federal Bureau of Prisons, COVID-19 Coronavirus, <https://www.bop.gov/coronavirus/> (last accessed May 15, 2020) *compare* California Department of Corrections and Rehabilitation, COVID-19 Preparedness, <https://www.cdcr.ca.gov/covid19/> (last accessed May 15, 2020).

⁵⁸ Department of Justice, FY 2019 Budget Request, p.2, *available at* https://www.justice.gov/jmd/page/file/1033_161/download

1 overcrowded prisons even more so.⁵⁹ In an attempt to mitigate the overcrowding
 2 issue, Terminal Island has reportedly moved prisoners to hastily erected tents and
 3 converted “rodent-infested, leaky” warehouses into makeshift living spaces.⁶⁰ Even
 4 with these emergency measures, Terminal Island has failed to ensure adequate social
 5 distancing or isolation of infected inmates. To the contrary, the exposure of
 6 prisoners to makeshift, unsanitary living spaces merely creates new hot zones for the
 7 virus to spread at an even more rapid rate.

8 48. Second, Terminal Island is a low-security prison, which houses some of
 9 least dangerous people in the custody of the federal corrections system. As a result,
 10 virtually all of the prisoners at Terminal Island are housed in open dormitory-style
 11 settings or cell tiers with communal areas where social distancing is impossible. For
 12 instance, Petitioner Lance Wilson lives in Housing Unit F, three tiers of double-
 13 occupancy cells containing 150 prisoners.⁶¹ Each of the three tiers has only a single
 14 bathroom containing four urinals, four showers, and four sinks for 50 prisoners to
 15 share.⁶² Prisoners’ only excursions out of their cells are to a limited set of communal
 16 areas, to retrieve food and pills, to congregate in the television room, and share a
 17 single phone.⁶³ Another petitioner, Maurice Smith, lived in Unit B at the beginning
 18 of the outbreak, a typical open dormitory-style housing arrangement, with 60 men
 19 cramped in a single room, bereft of barriers to provide any semblance of privacy or
 20

28 ⁶² *Id.*

⁶³ *Id.*

1 space from others.⁶⁴ Prisoners sleep in long rows, each man two feet from those on
 2 either side. Aware of the need to prevent the spread of COVID-19, prisoners have
 3 tried to take matters into their own hands by cleaning dormitories, but are limited to
 4 watered down disinfectant, dirty mops, and rags cut from blankets.⁶⁵

5 49. Third, Terminal Island is a Care Level 3 medical facility, designed to
 6 “provid[e] specialized or long-term medical or mental health care in a correctional
 7 environment.”⁶⁶ According to BOP guidelines on Care Level classification, “Care
 8 Level 3 inmates are outpatients who have complex, and usually chronic, medical or
 9 mental health conditions and who require frequent clinical contacts to maintain
 10 control or stability of their condition.”⁶⁷ Many prisoners with underlying conditions
 11 that increase vulnerability to COVID-19—including autoimmune conditions,
 12 diabetes, blood, heart, lung, kidney, and liver disease—default to Care Level 3.⁶⁸
 13 This includes Petitioner Wilson, who has been diagnosed with hypertension, is a
 14 long-time asthmatic, and takes medication for, high cholesterol,⁶⁹ and Petitioner
 15 Smith, who also has hypertension and asthma, and is also pre-diabetic.

16 50. These people are at Terminal Island precisely because they are the sort
 17 of people who are more at risk to COVID-19. Thus, the treatment load created by
 18 hundreds of infected prisoners at Terminal Island will be far greater than it would be
 19

20 ⁶⁴ Exhibit 2 (“Exh. 2,” Declaration of Jennifer Van Atta) ¶ 5.

26 ⁶⁸ See *id.*; compare Exh. 5 ¶ 8.

27 ⁶⁹ *Id.*

1 at an average prison, as more of the infected will require hospitalization and
 2 intensive care. This strain on medical resources, in turn, may increase the mortality
 3 rate of prisoners infected with COVID-19. Combined with the extraordinarily high
 4 infection rate, a high mortality rate would create an exponential threat to the health
 5 and safety of Terminal Island's prisoners.⁷⁰

6 51. In the face of a COVID-19 outbreak, Terminal Island has the worst of
 7 all worlds: it is overcrowded enough to make effective social distancing and
 8 isolation to be impossible, open and communal enough for inmates to frequently
 9 interact in close quarters to spread the disease, while also hosting a uniquely
 10 vulnerable inmate population.

11 **D. The Indifference of BOP and Respondents Has Allowed COVID-19 to**
 12 **Spread like Wildfire and Is Putting Inmates at Unconstitutional Risk**
 13 **Daily.**

14 52. As discussed *supra*, Terminal Island has failed to effectively distance
 15 or quarantine inmates, and their attempts to do so have merely exposed prisoners to
 16 further danger. Terminal Island's preventative failures can be divided into four
 17 categories: failure to adequately social distance; failure to provide adequate PPE;
 18 failure to adequately test and trace infected persons; and failure to provide
 19 constitutionally adequate medical care. Collectively, these failures have led to a
 20 devastating number of positive cases and the resulting serious harm and/or death
 21 caused in part by an overburdened medical care system.

22 53. This sad reality is borne out by the information prisoners have relayed
 23 to family members and friends despite Terminal Island's best efforts to keep them
 24 silenced. Since April 16, 2020, the prison has cut off most communications with the

25 ⁷⁰ See Exh. 5 ¶ 11 (due to advanced support care required for vulnerable
 26 populations, COVID-19 outbreaks can "put significant pressure on or exceed the
 27 capacity of local health infrastructure . . . to the extent that the health care
 28 infrastructure is overloaded, people will die unnecessarily").

1 outside world, forcing prisoners to communicate with their loved ones only through
2 letters and, since around May 9, sporadic five-minute phone calls.⁷¹

3 54. Counsel for Petitioners have attempted to arrange legal calls with four
4 prisoners incarcerated at FCI Terminal Island who had been identified by their
5 family members and friends as seeking Counsel's representation in this action.
6 Counsel have spoken with only one of them. None of the other calls have been
7 scheduled by the Bureau of Prisons ("BOP").

8 **1. Terminal Island has failed to take measures to create adequate**
9 **social distance.**

10 55. As discussed *supra*, Terminal Island's communal living spaces make
11 social distancing difficult, if not impossible, without a significant reduction in
12 population. The prison's solution has been to reduce the population density in
13 communal areas by setting up temporary living spaces: some inmates have been
14 placed in field tents, and others in at least one converted warehouse.

15 56. These temporary spaces have not created adequate social distance. The
16 math is simple: Terminal Island claims that over 200 people, or roughly 20% of the
17 prison population, have been placed in "alternative housing."⁷² Terminal Island,
18 however, is already 33% over capacity. The additional space, therefore, does not
19 reduce the overcrowding at Terminal Island even to its rated capacity, much less the
20 substantially reduced capacity necessary for social distancing.

21 57. Even worse, the deplorable sanitary conditions in the warehouse have
22 simply resulted in trading one hot zone of infection for another. According to
23 Petitioner Maurice Smith, the warehouse is considered so unsanitary that it is

24 _____
25 ⁷¹ Exhibit 8 ("Exh. 8," Declaration of Jimmy Threatt) ¶ 2.

28 29, 2020), available at <https://ktla.com/news/local-news/terminal-island-prison-sees-worst-coronavirus-outbreak-among-inmates-in-federal-system/>

1 “simply not fit for human habitation.”⁷³ The warehouse is infested by a veritable
 2 menagerie: mice, raccoons, wild cats, possums, skunks, and even bats that fly
 3 through holes in the ceiling.⁷⁴ Prisoners sleep on fold-out lawn beds that are only
 4 three feet from the floor, and the warehouse has no drinking water, no hot running
 5 water, and no heating—leaving Petitioner Smith to shiver through the night in
 6 uncomfortable sleeplessness.⁷⁵ Up to 60 prisoners share four toilets, four sinks, and
 7 four showers.⁷⁶ One could hardly imagine more ideal conditions for a dangerous
 8 communicable disease to spread.

9 **2. Terminal Island failed to implement even the most basic preventive**
 10 **measures.**

11 58. Inmates were not provided masks until late April, when in all
 12 likelihood COVID-19 had already gained an insurmountable foothold among the
 13 population.⁷⁷ But even that late attempt was more even more deficient than it
 14 seemed at the time, as Terminal Island’s promise to distribute new masks once a
 15 week quickly slipped to once every two weeks.⁷⁸ As such, prisoners have since been
 16 forced to re-use masks for extended periods. The shortage of masks is not a problem
 17 limited to prisoners: even nurses at Terminal Island regularly complain about the
 18 shortage of masks and other personal protective equipment.⁷⁹

19 59. Even aside from masks, officials have failed to take other simple steps
 20 that could be beneficial, such as providing hand sanitizer containing alcohol, hand

1 soap, disinfectants for commonly touched surfaces, and clean clothes. Such
 2 measures, while less important than fresh cloth masks, are still recommended by the
 3 CDC as effective in preventing the spread of COVID-19.

4 **3. Terminal Island has failed to adequately test, trace, and isolate**
 5 **persons infected by COVID-19.**

6 60. The WHO has called isolation, testing, and tracing “the backbone of
 7 response” to coronavirus, and specifically identified these methods as critical to the
 8 success of countries such as South Korea.⁸⁰ In order to slow the spread within high-
 9 risk populations, large numbers of individuals must be tested, those who are positive
 10 for COVID-19 must have their contacts must be traced to identify additional
 11 individuals who may be infected, and all must be isolated for a period of time. These
 12 practices would be extremely difficult to implement in a prison environment even in
 13 ideal conditions. At Terminal Island, a failed policy has already rendered conditions
 14 far from ideal.

15 61. Upon information and belief, for weeks after its first positive cases,
 16 Terminal Island maintained a policy of testing only symptomatic inmates, despite
 17 the fact that COVID-19 can be transmitted by asymptomatic or pre-symptomatic
 18 individuals.⁸¹ This policy did not change even after April 15, 2020, when Terminal
 19 Island reported its first COVID-19 related death.⁸² Terminal Island only begin to test
 20 its entire prisoner population on or around April 28, when over half had already

26 ⁸² Prisoner at Terminal Island in San Pedro Dies of Coronavirus, ORANGE COUNTY
 27 REGISTER (APRIL 15, 2020), *available at*
 28 [https://www.dailybreeze.com/2020/04/15/prisoner-at-terminal-island-in-san-pedro-](https://www.dailybreeze.com/2020/04/15/prisoner-at-terminal-island-in-san-pedro-dies-of-coronavirus/)
[dies-of-coronavirus/](https://www.dailybreeze.com/2020/04/15/prisoner-at-terminal-island-in-san-pedro-dies-of-coronavirus/)

1 been confirmed as infected.⁸³ Upon information and belief, aside from that one-time
2 test of the entire population, Terminal Island is even now not regularly testing
3 prisoners who may have been exposed to infected persons, nor is it testing
4 “recovered” COVID-19 patients before they are categorized as such and returned to
5 the general population.

6 62. As discussed in the preceding paragraphs, Terminal Island has made
7 virtually no effort to legitimately isolate prisoners. Instead, officials have resorted to
8 cohort-style segregation, presumably under the impression that all prisoners in a
9 given group are either positive or negative for COVID-19. For example, in Unit J,
10 where Petitioner Vasquez resides (after the aforementioned period in the
11 warehouse), every prisoner is (purportedly) negative for COVID-19.⁸⁴ If a prisoner
12 is determined to have contracted the disease, he is removed from the unit; however,
13 there are no other measures taken to assess whether others that prisoner has been in
14 close contact with have also contracted COVID-19. This situation exposes the
15 fundamental problem with such large-group separation tactics in the face of a highly
16 contagious disease, made all the worse given the facility’s failure to implement
17 repeat testing. And much of this segregation occurred before the facility-wide
18 testing, the one-time prisoners received fairly certain indications as to whether or
19 not they had contracted COVID.

20 63. Even when Terminal Island has not resorted to large cohort-style
21 segregation, it has still failed to implement true quarantines that would help prevent
22 the disease’s spread. Stephen Rines, a former inmate at Terminal Island, witnessed
23 groups of three prisoners who had returned from the hospital on different days being
24
25

26 ⁸³ Exh. 1 ¶ 17.

27 ⁸⁴ Exh. 3 ¶ 6.

1 placed together in a single room.⁸⁵ This practice continued until April 25, 2020.⁸⁶
 2 Mr. Rines also witnessed nurses at Terminal Island complain that there were not
 3 enough beds for all prisoners who were suspected of having COVID-19.⁸⁷ Their
 4 solution was to place symptomatic inmates who had not yet received test results
 5 (and thus their diagnoses were not confirmed) in the short stay unit, before returning
 6 them to general population, needlessly exposing scores of vulnerable prisoners
 7 undergoing medical treatment to the disease.⁸⁸

8 64. Upon information and belief, the failure of Terminal Island's isolation
 9 policy has been so comprehensive that of the nine residential units, there is now
 10 only one unit designated as "clean[,]” or reserved for persons who have tested
 11 negative for COVID-19. This designation, however, may be illusory: due to the lack
 12 of a continuous and consistent testing, tracing, and isolation policy, many of these
 13 individuals may have become infected since the testing that occurred in late April.

14 **4. Terminal Island has abdicated its responsibility to provide**
 15 **adequate medical care.**

16 65. Although Terminal Island is a Care Level 3 facility, its short-stay
 17 hospital unit simply does not have the resources to deal with a crisis of this scale.
 18 The unit has only nine rooms and about a dozen beds total.⁸⁹ Nurses who worked
 19 there have said that the hospital simply doesn't have enough beds to treat
 20 COVID-19 patients.⁹⁰ For the vast majority of the hundreds of prisoners at Terminal
 21 Island who have been infected with COVID-19, therefore, no monitoring or
 22

23 ⁸⁵ Exh. 4 ¶ 8.

24 ⁸⁶ *Id.*

25 ⁸⁷ *Id.*

26 ⁸⁸ *Id.* ¶ 10.

27 ⁸⁹ Exh. 4 ¶ 6.

28 ⁹⁰ *Id.* ¶ 9.

1 treatment has been forthcoming.

2 66. Throughout the entirety of the COVID outbreak at Terminal Island,
3 prisoners have rarely been afforded access to healthcare personnel or medical
4 treatment of any kind. The common refrain from correctional officers is to “hang in
5 there,” no matter how serious the symptoms.⁹¹ Even after facility-wide testing
6 revealed that COVID-19 had indeed spread through the ranks of prisoners and staff,
7 there has been no change in the approach of prison staff. For instance, Petitioner
8 Wilson suffers from asthma and hypertension, making him vulnerable to
9 COVID-19, tested positive, and experienced severe symptoms in the form of
10 migraines, body chills, and frequent sweating in his sleep. Despite constant
11 complaints, he has been left to languish in his cell.⁹²

12 67. Indeed, the only thing that apparently prompts a response of any kind
13 from staff is when an inmate’s condition deteriorates to the point that emergency
14 hospitalization is required. Even then, delays can ensue. For example, Mr. Rines
15 overheard one nurse complain that a prisoner suspected of having COVID-19 was
16 having difficulty breathing and the oxygen levels in his blood were low.⁹³ Even
17 though she recommended that he immediately be transferred to the off-site hospital,
18 no action was taken for many hours.⁹⁴

19 68. Finally, on information and belief, inmates have been deprived medical
20 care for their underlying conditions ever since COVID-19 began spreading like
21 wildfire. In any prison, this would be deeply troubling. But Terminal Island, as
22 discussed *supra*, is a Level 3 Care Facility. In short, it is a facility designated by the
23 BOP specifically to house prisoners with chronic medical conditions. In other
24

25 ⁹¹ See Exh. 3 ¶ 5; Exh. 2 ¶ 9.

26 ⁹² Exh. 1 ¶¶ 3, 21, 22.

27 ⁹³ Exh. 4 ¶ 10.

28 ⁹⁴ *Id.*

1 words, many of these inmates are in need of regular medical attention, which they
 2 have been deprived of while simultaneously being subjected to great danger. And
 3 their underlying conditions likewise make them more likely to suffer severe
 4 complications should they contract COVID-19.

5 69. Even in the face of this mounting public health catastrophe, Terminal
 6 Island has refused to seriously consider the obvious solution for stopping the spread
 7 and reducing the burden on its medical personnel: reducing the inmate population.
 8 Terminal Island has refused to exercise the authority it has to release people at high
 9 risk from infection, which would protect both those individuals and the others, who
 10 would remain at a less-crowded facility where effective social distancing and
 11 isolation and access to alternative medical care might be possible.

12 70. Terminal Island has been under significant political pressure to reduce
 13 its population. Senator Kamala Harris has stated that “[w]hat is happening at
 14 Terminal Island prison is a public health crisis DOJ must step in to protect staff
 15 and inmates and immediately release certain low-risk offenders.”⁹⁵ Congresswoman
 16 Nanette Barragan has noted that “Prison leadership either had no idea how to protect
 17 inmates in their care for this, or they simply did not pay attention. Either of those is
 18 completely unacceptable.”⁹⁶

19 71. But despite the public pressure from politicians, Respondents continued
 20 to move at a glacial pace. For six days, as the virus continued to run rampant, BOP
 21 and Warden Ponce did not respond to Congresswoman Barragan’s request for a
 22 meeting to discuss the health crisis in Terminal Island. On April 30, 2020,
 23 Congresswoman Barragan was finally able to speak to Warden Ponce by telephone

26 ⁹⁶ Miriam Hernandez, *COVID-19 infects more than half of inmates at Terminal*
 27 *Island prison in San Pedro*, ABC 7 (Apr. 29, 2020) [https://abc7.com/terminal-](https://abc7.com/terminal-island-prison-coronavirus-covid19-bureau-of-prisons/6138903/)
 28 [island-prison-coronavirus-covid19-bureau-of-prisons/6138903/](https://abc7.com/terminal-island-prison-coronavirus-covid19-bureau-of-prisons/6138903/)

1 and learned that, despite claims that Terminal Island was practicing social
 2 distancing, the people incarcerated remained “in close proximity with each other.”
 3 On the same call, Warden Ponce told the Congresswoman that she was considering
 4 permitting home confinement for only 46 vulnerable individuals, and only a handful
 5 of requests had actually been granted.⁹⁷

6 **E. The Efforts of the Bureau of Prisons Are Inadequate.**

7 72. The BOP has failed to respond effectively to the COVID-19 pandemic.
 8 The BOP failed to anticipate and prepare for the magnitude of the threat that
 9 COVID-19 poses to its own staff and the people it detains; it then failed to respond
 10 in any meaningful way to initial signs of uncontrolled outbreaks at several of its
 11 facilities across the country, including Terminal Island; and it has continued to fail
 12 to implement even the baseline measures that would assure the safety of its own
 13 staff, of Petitioners and their fellow class members and others incarcerated by the
 14 BOP, and of the communities into which staff and others travel on a daily basis.

15 73. The BOP’s preparations were inadequate from the start. The BOP did
 16 not issue initial guidance until March 9, and even then addressed only the possibility
 17 of telework for some employees at an agency where the vast majority of workers
 18 must physically appear at facilities to do their jobs, and mentioned restrictions only
 19 for people who had traveled to already-impacted countries.⁹⁸

20 74. Moreover, the BOP did not make any changes to protocols that call for
 21 prisoners to purchase their own cleaning supplies from commissary—preventing
 22 many indigent and poor prisoners from being able to buy those supplies—and for

1 them to maintain responsibility for cleaning and sanitizing their spaces (whether
2 they have supplies or not).⁹⁹

3 75. In fact, as late as March 26—weeks after many cities and states had
4 closed restaurants and non-essential businesses, restricted travel, and ordered people
5 to shelter in place—the BOP Director announced that the BOP had merely taken an
6 inventory of soap, rather than taken steps to distribute it at no cost or even at a
7 reduced cost.¹⁰⁰

8 76. Among other failures that contributed to spread at BOP facilities,
9 officers reported that even as of late March, they were given only gloves—not
10 masks, face shields, or other PPE—when interacting with prisoners sick enough to
11 require transport to the hospital.¹⁰¹ Those same officers were ordered back to the job
12 in defiance of CDC guidance that called for self-isolation by correctional staff who
13 had been exposed.¹⁰²

14 77. Unicor, an entity that runs prisoner work programs for the BOP,
15 continued operating throughout the pandemic and did not began distributing masks
16
17

28

1 to prisoner workers and correctional officers until about April 2, 2020.¹⁰³

2 78. Across facilities, the BOP has been “scrambling” to address staffing
3 and resource needs. Despite this, the BOP has continued to limit the number of
4 contractors who can supply PPE, does not have enough tests, and has been sued by
5 its own staff for requiring them to work in hazardous working conditions.¹⁰⁴ The
6 BOP has repeatedly understated the scope of the problem and refused to take steps
7 to assess the situation transparently. For example, the BOP has been artificially
8 reducing their number of reported positive cases by classifying individuals who
9 previously tested positive for COVID-19 but no longer showing symptoms as
10 “recovered” and removing them from the count of positive cases, without re-testing
11 them to confirm that the virus is no longer present in their bodies.¹⁰⁵

12 79. BOP’s under-reporting of the outbreak at FCI Elkton provides another
13 stark example of their lack of transparency. As of April 6, the BOP had reported
14 eight prisoners and one staff had tested positive at FCI Elkton.¹⁰⁶ Press accounts,
15 however, reported that medical staffing had fallen to fifty percent of capacity, and
16 that three prisoners had already died as of April 6.¹⁰⁷ The full scope of the problem

1 did not become clear until a federal judge ordered the facility to increase testing,
 2 after the BOP admitted that it only had 55 tests on hand for a facility of more than
 3 2,400 prisoners.¹⁰⁸

4 80. Conditions had already deteriorated so thoroughly that Ohio Governor
 5 Mike DeWine called in the state's National Guard to FCI Elkton, a federal prison.¹⁰⁹
 6 At the press conference announcing that decision, Governor DeWine called on the
 7 BOP to stop sending new prisoners to Elkton.¹¹⁰ And the accuracy of the BOP's
 8 reporting of COVID-19 cases in Elkton is in doubt.¹¹¹

9 81. Ultimately, the U.S. District Court for the Northern District of Ohio
 10 ordered enlargement of custody for medically vulnerable prisoners at FCI Elkton
 11 pending resolution of a class habeas petition on the merits, because of the outbreak

1 already raging at the facility.¹¹²

2 82. Such conditions at numerous facilities across the country have led BOP
3 employees including corrections officers to file a complaint with the Occupational
4 Safety and Health Administration (OSHA) alleging unsafe conditions at numerous
5 federal prisons nationwide, including Terminal Island. Among other things, the
6 officers' OSHA complaint points to the BOP having "directed staff through the
7 Bureau of Prisons who have come in contact with, or been in close proximity to,
8 prisoners who show or have shown symptoms of COVID-19, to report to work and
9 not be self-quarantined for 14 days per the CDC guidelines." It also complains of
10 the BOP having failed to undertake any workplace or administrative controls to
11 address transmission, to require social distancing or other measures in the CDC
12 guidance, or to provide sufficient PPE.¹¹³

13 83. In apparent response, the BOP released a short document titled
14 "Correcting Myths and Misinformation about BOP and COVID-19."¹¹⁴ In
15 attempting to rebut the assertion that staff who had been in contact with prisoners
16 who showed symptoms of COVID-19 still had to come to work, the BOP simply
17 confirmed that such employees *were* required to come to work, with masks.¹¹⁵

26 ¹¹⁵ *Id.* at 3 ("In keeping with CDC 'Guidance for Safety Practices for Critical
27 Infrastructure Workers Who May Have Had Exposure to a Person with Suspected or
28 Confirmed COVID-19,' the BOP performs pre-screening of all employees reporting
to work and requires exposed workers to wear a mask for 14 days after last

1 84. The CARES Act, signed into law on March 27, makes funding
 2 available for federal prisons to purchase PPE and test kits for COVID-19 in addition
 3 to authorizing the Department of Justice to lengthen the maximum amount of time
 4 that a prisoner can be placed in home confinement during the pandemic, as
 5 discussed above.¹¹⁶ Acting under that authority, Attorney General Barr made a
 6 finding that emergency conditions are materially affecting the functioning of the
 7 BOP, and on April 3 he directed Respondent Carvajal to review prisoners with
 8 COVID-19 risk factors to determine their eligibility for home confinement, stating
 9 that the BOP's efforts to prevent COVID-19 from entering BOP facilities and
 10 infecting prisoners have "not been perfectly successful at all institutions."¹¹⁷

11 85. Attorney General Barr also released guidance in the form of a series of
 12 letters suggesting that some BOP prisoners should be released.¹¹⁸ Those letters
 13 merely encourage the BOP to exercise discretion that it has declined to use, and they
 14 do not actually direct the release of categories of prisoners, much less on a scale that
 15 would allow for safe social distancing in the facilities or with the speed that the
 16 health crisis requires. Of the relatively small number of people released, the BOP
 17 has not reported the number who subsequently died.

18 86. On April 22, the BOP issued a memo purporting to interpret Attorney
 19 General Barr's guidance, substantially limiting the number and types of people who
 20

21
 22 exposure. They are also expected to perform regular self-monitoring for symptoms,
 23 practice social distancing and to disinfect and clean their work spaces. Anyone who
 24 develops signs or symptoms of illness are sent home."").

25 ¹¹⁶ CARES Act, Pub. L. No. 116-136, § 12003(b), 134 Stat. 281 (2020).

26 ¹¹⁷ Memorandum from Attorney General Barr to Director Carvajal (Apr. 3, 2020),
 available at <https://www.justice.gov/file/1266661/download>

27 ¹¹⁸ See Mar. 26, 2020 and Apr. 3, 2020 Memoranda For Director of Bureau Prisons
 28 from Attorney General Barr, available at <https://www.justice.gov/coronavirus>

1 might qualify for home confinement under the Attorney General’s memos.¹¹⁹ Even
 2 though the April 3 Barr memo directed the BOP to “immediately maximize
 3 appropriate transfers to home confinement,” including prioritizing those at
 4 “outbreak prisons,” the BOP’s own guidance excludes the vast majority of prisoners
 5 in its custody by adding a number of barriers to consideration for release.

6 87. The BOP’s April 22 guidance gave wardens virtually unchecked
 7 discretion to deny a request for release and imposes unnecessary and arbitrary
 8 barriers on prisoners seeking release. For example, pursuant to the BOP’s guidance
 9 from April 22: (i) prisoners must have had no disciplinary infractions of any kind for
 10 12 months; (ii) prisoners must provide verification that they would have a lower risk
 11 of contracting COVID-19 outside the prison than inside of it, and, (iii) prisoners
 12 with any on-going medical care must show their medical needs can be met outside
 13 the prison, and that they have a 90-day supply of prescribed medications. After
 14 reports of positive cases continued to explode, on May 8, 2020, BOP amended this
 15 guidance to relax a few criteria, but it continues to be far more restrictive than the
 16 recommendations proposed by Attorney General Barr.

17 88. The appalling conditions of BOP facilities across the country, and the
 18 BOP’s failures to address the constitutional rights of prisoners in its care, have
 19 forced federal courts to address BOP failures in a large number of individual cases

 23 the rapidly escalating public health crisis”); *Frailhat v. Wolf*, No. 5:20-CV-590 (C.D.
 24 Cal. Mar. 30, 2020).

25 ¹²⁴ *E.g.*, *In re Request to Commute or Suspend County Jail Sentences*, Docket No.
 084230 (N.J. Mar. 22, 2020) (releasing large class of defendants serving time in
 26 county jail “in light of the Public Health Emergency” caused by COVID-19).

27 ¹²⁵ *E.g.*, *United States v. Stahl*, No. 18-cr-694, 2020 WL 1819986 (S.D.N.Y.
 28 Apr. 10, 2020).

1 guidance for correctional settings, and that the measures were “necessary to stop the
 2 spread of the virus and save lives.”¹²⁶ Similarly, the District of Connecticut has
 3 ordered FCI Danbury to evaluate and release medically vulnerable inmates on an
 4 accelerated basis.¹²⁷

5 V.

6 **LEGAL GROUNDS FOR PETITION**

7 **A. Respondents’ Failure to Take Steps to Mitigate Transmission of** 8 **COVID-19 Constitutes Deliberate Indifference to the Serious Medical** 9 **Needs of Petitioner.**

10 90. Respondents are violating Petitioners’ Eighth Amendment rights by
 11 continuing to incarcerate them in conditions that place them at substantial risk of
 12 serious harm from transmission of an infectious and deadly disease, especially
 13 considering Petitioners’ vulnerable conditions.

14 91. All individuals held at Terminal Island have been convicted and
 15 assigned by the BOP to serve time at Terminal Island. Therefore, the treatment of all
 16 individuals incarcerated at Terminal Island, including the treatment of Petitioners, is
 17 governed by the Eighth Amendment. *See Wilhelm v. Rotman*, 680 F.3d 1113, 1122
 18 (9th Cir. 2012). The Ninth Circuit employs a two-part test in assessing whether
 19 prison officials have violated the Eighth Amendment by way of deliberately
 20 indifference to the medical needs of inmates: (1) the plaintiff must have “a serious
 21 medical need by demonstrating that failure to treat a prisoner’s condition could
 22 result in further significant injury or the unnecessary and wanton infliction of pain”;
 23 and (2) the defendants’ “response to the need” must have been “deliberately
 24 indifferent.” *Id.*

25 92. Government officials act with deliberate indifference when they
 26

27 ¹²⁶ *Wilson*, 2020 WL 1940882, at *8.

28 ¹²⁷ *Martinez-Brooks*, 2020 WL 2405350, at *32.

1 “ignore a condition of confinement that is sure or very likely to cause serious illness
 2 and needless suffering the next week or month or year,” even when “the
 3 complaining inmate shows no serious current symptoms.” *Helling v. McKinney*, 509
 4 U.S. 25, 33 (1993). This Court need not “await a tragic event” to find that
 5 Respondents are maintaining unconstitutional conditions of confinement. *Id.* at 32–
 6 33. This is so not only because a tragedy is ongoing, but because even petitioners
 7 and class members who have not yet tested positive have a constitutional right to be
 8 free from conditions of confinement that “pose an unreasonable risk of serious
 9 damage to [Petitioner’s] future health.” *Id.* at 35.

10 93. Indeed, the threat of exposure to a deadly infectious disease such as
 11 COVID-19 and subsequent mistreatment due to lack of resources constitutes a
 12 serious risk to health, particularly for the Petitioners because of their unique
 13 vulnerability to COVID-19. *See Helling*, 509 U.S. at 34 (noting with approval
 14 Eighth Amendment claims based on exposure to serious contagious diseases);
 15 *Unknown Parties v. Johnson*, No. cv-15-00250, 2016 WL 8188563, at *15 (D. Ariz.
 16 Nov. 18, 2016), *aff’d sub nom Doe v. Kelly*, 878 F.3d 710 (finding evidence of
 17 medical risks associated with . . . being exposed to communicable diseases” adequate
 18 to establish irreparable harm under the Eighth Amendment); *Castillo v. Barr*, --- F.
 19 Supp. 3d ---, 2020 WL 1502864, at *5 (C.D. Cal. Mar. 27, 2020) (in civil
 20 detainment context, ruling that officials could not “be deliberately indifferent to the
 21 potential exposure of civil detainees to a serious, communicable disease on the
 22 ground that the complaining detainee shows no serious current symptoms, or ignore
 23 a condition of confinement that is more than very likely to cause a serious illness”).

24 94. As such, Petitioners are entitled to be protected from conditions of
 25 confinement that create a serious risk to health or safety, including through release
 26 from custody when necessary. *Brown v. Plata*, 563 U.S. 493, 531–32 (2011)
 27 (upholding lower court’s order releasing people from state prison even though
 28 release was based on prospect of future harm caused by prison overcrowding); *see*

1 *also Farmer v. Brennan*, 511 U.S. 825, 834 (1994) (correctional official violates
2 Eighth Amendment by consciously failing to prevent “a substantial risk of serious
3 harm”).

4 95. Under Terminal Island’s current conditions, Respondents have not and
5 cannot protect Petitioners and the class from this well-known risk of serious harm.
6 In these circumstances, enlargement of custody and, if necessary, release, is required
7 to protect Petitioners and other prisoners with high- risk health conditions from
8 unconstitutional custody.

9 96. In this case, as established by the facts above, Petitioners face a
10 significant risk of exposure to COVID-19, with the attendant risk of death that
11 follows given their vulnerable conditions. Respondents are well aware of this risk,
12 having been alerted to it by the CDC, the Attorney General, BOP guidance,
13 widespread news reporting, and the ongoing outbreak at various BOP facilities
14 including Terminal Island itself. Indeed, the Second Circuit Court of Appeals,
15 unprompted, acknowledged over a month ago the “grave and enduring” risk posed
16 by COVID-19 in the correctional context. *Fed. Defs. of New York, Inc. v. Fed.*
17 *Bureau of Prisons*, No. 19-1778, -- F.3d --, 2020 WL 1320886, at *12 (2d Cir.
18 Mar. 20, 2020).

19 97. Finally, as established above, Respondents have not taken steps
20 sufficient to protect Petitioners from the grave risks that are present every moment
21 he is incarcerated at Terminal Island. Respondent Ponce has recklessly failed to
22 follow or implement CDC guidance or directives from Attorney General Barr or the
23 BOP. Respondents are not capable of managing the risk to Petitioners in the
24 facility’s current environment. Respondents are holding Petitioners in violation of
25 their Eighth Amendment rights by detaining them in the face of significant threats to
26 his health and safety without taking reasonable steps to prevent or address that harm.

B. Overcrowding Ensures That Respondents Cannot Implement Recommended Measures Required to Protect Petitioner's Health, and Violates the Eighth Amendment.

98. Respondents are violating Petitioners' Eighth Amendment rights by continuing to incarcerate them in conditions that place them at substantial risk of serious harm from transmission of an infectious and deadly disease.

99. As alleged above, the BOP has thus far failed to implement effective social distancing across its facilities, including and particularly at Terminal Island, with disastrous effects. Part of this failure reflects the nature of correctional confinement; however, a large part here owes to the particular circumstances of Terminal Island's design, capacity, and deliberate choices about policies by Respondents.

100. Respondents have chosen to overcrowd Terminal Island in the midst of a global pandemic at a rate of 133% capacity. The profound and purposeful overcrowding Terminal Island ensures that effective social distancing is impossible, and it stymies Respondents' ability to follow and implement the CDC Interim Guidance and other viral-transmission prevention measures.

101. Courts have long found that facilities' populations may exacerbate existing harms entirely unrelated to the fact of crowding itself, including cases where overcrowding may inhibit a facility's ability to mitigate incarcerated individuals' risk of contracting dangerous diseases. The Supreme Court itself has recognized that correctional defendants such as Respondents can violate the Eighth Amendment when they crowd prisoners into shared spaces with others who have "infectious maladies." *Helling v. McKinney*, 509 U.S. 25, 33 (1993); *see also Hutto v. Finney*, 437 U.S. 678, 682–85 (1978) (recognizing the need for a remedy where prisoners were crowded into cells and some had infectious diseases).

102. Such decisions make particular sense in light of substantial corroborating evidence that transmission becomes more likely in light of, among

1 other factors, relative crowding of people together. *See, e.g.*, Joseph A. Bick,
 2 *Infection Control in Jails and Prisons*, 45 Clinical Infectious Diseases 1047, 1047
 3 (Oct. 2007) (“The probability of transmission of potentially pathogenic organisms is
 4 increased [in jails and prisons] by crowding, delays in medical evaluation and
 5 treatment, rationed access to soap, water, and clean laundry, [and] insufficient
 6 infection-control expertise.”), available at <https://bit.ly/2QZA494>.

7 103. In this case, Petitioners face an elevated risk of serious illness both
 8 because of particular failures on the part of Respondents as alleged above, and
 9 because Respondents have chosen to overcrowd the facility. The current population
 10 of Terminal Island, both of incarcerated individuals and the staff who come through
 11 on a daily basis and work in the same confined space, ensures that any effective
 12 measures that would mitigate Petitioner’s exposure to and risk of serious illness
 13 from COVID-19 are impossible to implement.

14 VI.

15 CLASS ACTION ALLEGATIONS

16 104. Petitioners bring this action pursuant to Rule 23(b)(2) of the Federal
 17 Rules of Civil Procedure on their own behalf and on behalf of all persons similarly
 18 situated.

19 105. Petitioners seek to represent a class consisting of all current and future
 20 people in post-conviction custody at Terminal Island (the “Class”)¹²⁸

21 106. The members of both the Class are too numerous to be joined in one
 22 action, and their joinder is impracticable. Upon information and belief, the Class
 23 exceeds 1,000 individuals.

24 107. Several common questions of law and fact apply to all Class members.
 25 These common questions of fact and law include but are not limited to: (1) whether
 26 the conditions of confinement described in this Petition amount to constitutional
 27

28 ¹²⁸ *See* Exh. 5 ¶ 8.

1 violations; (2) what measures Respondents have taken and are taking in response to
2 the COVID-19 crisis; (3) whether Respondents have implemented and are
3 implementing an adequate emergency plan during the COVID-19 crisis; (4) whether
4 Respondents' practices during the COVID-19 crisis have exposed and are exposing
5 prisoners at Terminal Island to a substantial risk of serious harm; (5) whether the
6 Respondents have known of and disregarded a substantial risk of serious harm to the
7 safety and health of the Class; and (6) what relief should be awarded to redress the
8 harms suffered by members of the Class as a result of the conditions.

9 108. Absent class certification, individuals incarcerated at Terminal Island
10 during the COVID- 19 pandemic would face a series of barriers in accessing the
11 relief sought. Terminal Island has suspended visitation, and individuals incarcerated
12 there have limited access to communication with the outside world, impeding their
13 ability to obtain legal representation and pursue litigation. Because the Class are all
14 sentenced prisoners, they do not have defense attorneys already working with them
15 on their criminal proceedings. And a large portion of the Class has limited
16 educational backgrounds and financial means.

17 109. Respondents' practices and the claims alleged in this Petition are
18 common to all members of the Class.

19 110. The claims of Petitioners are typical of those of the Class. Petitioners,
20 like all others at Terminal Island, are currently being held in unconstitutional
21 custody at Terminal Island. Petitioners Wilson and Smith, like many members of the
22 Class, have underlying conditions that enhance their risk of serious illness or death
23 from COVID-19. The legal theories on which Petitioners rely are the same or
24 similar to those on which all Class members would rely, and the harms suffered by
25 them are typical of those suffered by all the other Class members.

26 111. The legal theories on which Petitioners rely are the same or similar to
27 those on which all Class members would rely, and the harms suffered by them are
28 typical of those suffered by all the other Class members.

112. Petitioners will fairly and adequately protect the interests of the Class. The interests of the Class representatives are consistent with those of the Class members. In addition, counsel for Petitioners are experienced in class action and civil rights litigation and in criminal law.

113. Counsel for Petitioners knows of no conflicts of interest among Class members or between the attorneys and Class members that would affect this litigation.

VII.

CLAIMS FOR RELIEF

FIRST CLAIM FOR RELIEF

(Eighth Amendment)

Unconstitutional Conditions of Confinement in Violation of the Eighth Amendment to the U.S. Constitution

28 U.S.C. § 2241/28 U.S.C. § 2243

Class versus All Defendants

114. Petitioners incorporate by reference each and every allegation contained in the preceding paragraphs as if set forth fully herein.

115. Petitioners bring this claim on their own behalf and on behalf of the Class.

116. The Eighth Amendment guarantees sentenced prisoners custody free of “a condition of confinement that is sure or very likely to cause serious illness and needless suffering the next week or month or year.” *Helling*, 509 U.S. at 33; *see also* U.S. Const. Amend VIII. The government’s failure to protect the prisoners in its custody from a widespread outbreak of a serious contagious disease that causes potentially permanent damage or death constitutes deliberate indifference in violation of the Eighth Amendment to the United States Constitution.

117. Petitioners and the Class are at severe risk of contracting COVID-19 because 60% of inmates have already tested positive. Petitioners and many members

1 of the Class are uniquely vulnerable to serious complications or death from
2 contracting COVID-19 because of their age and/or because they suffer from medical
3 conditions that render them uniquely vulnerable.

4 118. Because of the conditions at Terminal Island, Petitioners and Class
5 members cannot take steps to protect themselves—such as social distancing, hand-
6 washing hygiene, or self-quarantining—and the government has not provided
7 adequate protections. As COVID-19 rapidly spreads inside Terminal Island, the
8 already deplorable conditions at the prison will continue to deteriorate, and
9 incarcerated individuals there will continue to contract COVID-19 at staggering
10 rates. Due to inadequate medical care at Terminal Island, the health and safety of
11 those who contract COVID-19 will be put in unconstitutional danger.

12 119. Petitioners contend that the fact of their confinement in prison itself
13 amounts to an Eighth Amendment violation under these circumstances, and nothing
14 short of an order ending their confinement at Terminal Island will alleviate that
15 violation.

16 120. Respondent's failure to adequately protect Petitioners from these
17 unconstitutional conditions, or release them from the conditions altogether,
18 constitutes deliberate indifference to a substantial risk of serious harm to Petitioners,
19 and all members of the Class, thereby establishing a violation of the Eighth
20 Amendment to the United States Constitution.

21 121. Respondents were aware or should have been aware of these
22 conditions, which were and are open and obvious throughout the entire prison

23 122. Respondents knew of and disregarded an excessive risk to health and
24 safety.

25 123. Respondents failed to act with reasonable care to mitigate these risks,
26 subjecting Petitioners to a grave and serious risk of harm of serious illness,
27 permanent injury, or death.

28 124. Because Respondents failed to act to remedy Petitioners' and the

1 Class's degrading and inhumane conditions of confinement in violation of their
 2 Eighth Amendment rights, Petitioners seek relief under this Writ of Habeas Corpus
 3 Petition and Class Action Complaint.

4 125. Because of the unlawful conduct of Respondents, Petitioners and the
 5 Class are threatened with imminent physical injury, pain and suffering, emotional
 6 distress, humiliation, and death.

7 **SECOND CLAIM FOR RELIEF**

8 **(Eighth Amendment)**

9 **Unconstitutional Conditions of Confinement in Violation of the** 10 **Eighth Amendment to the U.S. Constitution**

11 **Injunctive Relief Only**

12 U.S. Const. Amend. VIII; 28 U.S.C. § 1331; 5 U.S.C. § 702

13 *Class versus All Defendants in their Official Capacities*

14 126. Petitioners incorporate by reference each and every allegation
 15 contained in the preceding paragraphs as if set forth fully herein.

16 127. Petitioners bring this claim on their own behalf and on behalf of the
 17 Class.

18 128. This claim does not seek the release of any members of the Class and
 19 accordingly is not maintained pursuant to 28 U.S.C. § 2241. However, it is well-
 20 established that individuals may sue to enjoin constitutional violations, either
 21 directly under the Constitution or under the Administrative Procedure Act. *See*
 22 *Sierra Club v. Trump*, 929 F.3d 670, 694 (9th Cir. 2019) ("Plaintiffs may bring their
 23 challenge through an equitable action to enjoin unconstitutional official conduct, or
 24 under the judicial review provisions of the Administrative Procedure Act
 25 ("APA"), 5 U.S.C. § 701 *et seq.*, as a challenge to a final agency decision that is
 26 alleged to violate the Constitution, or both."); *Fazaga v. FBI*, 916 F.3d 1202, 1239-
 27 1241 (9th Cir. 2019) (permitting claims against federal officials in their official
 28 capacities for injunctive relief directly under the Fourth Amendment, even though

1 Privacy Act provides for other remedies, and contrasting them to direct actions
 2 under the Fourth Amendment for money damages, which are *Bivens* claims); *Jones*
 3 *v. Hurwitz*, 324 F. Supp. 3d 97, 100 (D.D.C. 2018) (finding that a *Bivens* claim
 4 could not be maintained because allegations were against defendants in their official
 5 capacities but that equitable action could have been maintained as a “direct cause of
 6 action arising under the Constitution”); *Farmer v. Brennan*, 511 U.S. 825, 846
 7 (1994) (“If the court finds the Eighth Amendment’s subjective and objective
 8 requirements satisfied” with regard to a federal prisoner, “it may grant appropriate
 9 injunctive relief.”).

10 129. Because of the conditions at Terminal Island, Petitioners and Class
 11 members cannot take steps to protect themselves—such as social distancing, hand-
 12 washing hygiene, or self-quarantining—and the government has not provided
 13 adequate protections. As COVID-19 rapidly spreads inside Terminal Island, the
 14 already deplorable conditions at the prison will continue to deteriorate, and
 15 incarcerated individuals there will continue to contract COVID-19 at staggering
 16 rates.

17 130. Respondent’s failure to adequately protect Petitioners from these
 18 unconstitutional conditions, or release them from the conditions altogether,
 19 constitutes deliberate indifference to a substantial risk of serious harm to Petitioners,
 20 and all members of the Class, thereby establishing a violation of the Eighth
 21 Amendment to the United States Constitution.

22 131. Because of the unlawful conduct of Respondents, Petitioners and the
 23 Class are threatened with imminent physical injury, pain and suffering, emotional
 24 distress, humiliation, and death.

25 **VIII.**

26 **RELIEF REQUESTED**

27 WHEREFORE, Petitioners and the Class, respectfully request that the Court:

28 1. Declare that Terminal Island’s custody of Petitioners and the Class

1 violates the Eighth Amendment right against cruel and unusual punishment with
2 respect to Petitioners and the Class;

3 2. Order a highly expedited process—for completion within no more than
4 48 hours—for Respondents to use procedures available under the law to review
5 members of the Class for enlargement of custody to home confinement (or bail
6 pending habeas corpus) in order to reduce the density of the prison population to
7 a number that allows for the implementation of appropriate measures to prevent the
8 spread of COVID-19, during the pendency of this petition for a writ of habeas
9 corpus;

10 3. Order respondents to comply with the Constitution for any Class
11 members who do not receive temporary enlargement and remain at Terminal Island
12 during the pendency of the petition;

13 4. Grant a writ of habeas corpus for all members of the class that received
14 temporary enlargement within one day of the Court's order and release all such
15 persons within twenty-four hours;

16 5. Enter a temporary restraining order, preliminary injunction and
17 permanent injunction requiring Respondents to immediately adopt mitigation efforts
18 to protect all Class Members not released, including but not limited to:

19 A. Providing adequate spacing of six feet or more between
20 incarcerated people so that social distancing can be accomplished
21 in accordance with CDC guidelines;

22 B. Ensuring that each incarcerated person receives, free of charge,
23 an individual supply of hand soap and paper towels sufficient to
24 allow frequent hand washing and drying each day; an adequate
25 supply of clean implements for cleaning such as sponges and
26 brushes and disinfectant hand wipes or disinfectant products
27 effective against the virus that causes COVID-19 for daily
28 cleanings;

- 1 C. Ensuring that all incarcerated people have access to hand
2 sanitizer containing at least 60% alcohol;
- 3 D. Providing access to daily showers and daily access to clean
4 laundry, including clean personal towels and washrags after each
5 shower;
- 6 E. Requiring that all Terminal Island staff wear personal protective
7 equipment, consistent with the CDC guidance, including masks
8 and gloves, when interacting with any person or when touching
9 surfaces in cells or common areas;
- 10 F. Requiring that all Terminal Island staff wash their hands, apply
11 hand sanitizer containing at least 60% alcohol, or change their
12 gloves both before and after interacting with any person or
13 touching surfaces in cells or common areas;
- 14 G. Taking the temperature of all class members and screening for
15 symptoms of COVID-19 of all class members, prison staff, and
16 visitors daily (with a functioning and properly operated and
17 sanitized thermometer) to identify potential COVID-19
18 infections;
- 19 H. Assessing (through questioning) each incarcerated person daily
20 to identify potential COVID-19 infections;
- 21 I. Ensuring that all class member and prison staff exposed to
22 individuals with known cases of COVID-19 be isolated from
23 individuals who have not tested positive.
- 24 J. Immediately providing on a daily basis clean masks for all
25 individuals who display or report potential COVID-19 symptoms
26 until they can be evaluated by a qualified medical professional or
27 placed in non-punitive quarantine and ensure the masks are
28 properly laundered with replacements as necessary;

- 1 K. Ensuring that individuals identified as having COVID-19 or
- 2 having been exposed to COVID-19 receive adequate medical
- 3 care and are properly quarantined (without resorting to
- 4 cohorting, if possible), in a non-punitive setting, with continued
- 5 access to showers, recreation, mental health services, reading
- 6 materials, phone and video visitation with loved ones,
- 7 communications with counsel, and personal property;
- 8 L. Cleaning and disinfecting frequently touched surfaces with
- 9 disinfectant products effective against the virus that causes
- 10 COVID-19 (at the manufacturer's recommended concentration),
- 11 as well as surfaces in common areas, every two hours during
- 12 waking hours, and at least once during the night;
- 13 M. Assuring incarcerated people are told they will not be retaliated
- 14 against for reported COVID-19 symptoms;
- 15 N. Providing necessary medical treatment consistent with
- 16 community standards for incarcerated people who are ill because
- 17 of COVID-19;
- 18 O. Responding to all emergency (as defined by the medical
- 19 community) requests for medical attention within an hour;
- 20 P. Crafting a mechanism to ensure compliance through the
- 21 appointment of an independent monitor with medical expertise to
- 22 ensure compliance with these conditions, and provide the
- 23 monitor with unfettered access to medical units, confidential
- 24 communication with detained individuals in and out of
- 25 quarantine, and surveillance video of public areas of the
- 26 facilities.

27 6. Certify this petition as a class action, for the reasons stated herein;

28 7. Award Plaintiffs' attorneys' fees and costs, as provided by statute and

1 law; and

2 8. Order such other and further relief as this Court deems just, proper and
3 equitable.

4 *Local Rule 5-4.3.4(a)(2)(i) Compliance: Filer attests that all other*
5 *signatories listed concur in the filing's content and have authorized this filing.*

DECLARATION OF JACQUE WILSON

I, Jacque Wilson, am over the age of 18 and fully competent to declare as follows:

1. I am a Deputy Public Defender at the San Francisco Public Defender's Office. My California State Bar Number is 214259.

2. My brother is Lance Aaron Wilson. Lance is 35 years old. My brother is currently incarcerated at FCI Terminal Island in San Pedro, California. His BOP Register Number is 72372-097.

3. My brother has lived with asthma for most of his life. While incarcerated, he was also diagnosed with hypertension. Currently, he has been prescribed Lisinopril 20 mg and Hydrochlorothiazide for his hypertension. He has also been prescribed Atorvastatin for his high cholesterol.

4. I am writing this declaration on my brother's behalf because he has had extreme difficulty making phone calls and has not been able to get in direct contact with an attorney. On April 16, 2020, my brother was told that prisoners would not be able to use phones and computers until further notice. From then until May 9, 2020, the only way he has been able to communicate with my father and me has been through letters. I had three five-minute phone calls with my brother on May 9, May 10, and May 14. During our call on May 9, he confirmed to me that he wished to be a party to this lawsuit.

5. Up until May 14, 2020, he was not able to make a legal call to a lawyer since April 16, 2020. I understand that on May 14, 2020, he had a brief legal call with one of the attorneys representing him in this lawsuit.

6. Through calls and letters, my brother has told me about the horrific conditions inside of Terminal Island. I have described them in more detail below, but in short, for weeks, the prison did nothing to protect my brother and other prisoners from catching the virus, and on May 6, 2020, my brother told me he tested positive for COVID-19. Despite having body chills and severe migraines, he has

1 not been able to see a doctor or get any treatment, and he fears he will be left to die.

2 7. The following is information passed onto me from my brother through
3 letters and short phone calls. I have confirmed with my brother that this information
4 is correct to the best of his knowledge:

5 8. My brother currently resides in Housing Unit F (“Unit F”) at Terminal
6 Island. Unit F is divided into three floors, known as “tiers,” with 50 people on each
7 tier, for a total of 150 people. Everyone in Unit F is housed in a two-person cell,
8 and each cell contains a bunkbed. There is only two feet of space separating the top
9 bunk from the bottom bunk, which are so close that while sleeping on the top bunk,
10 my brother can reach down and touch his cellmate on the bottom bunk.

11 9. There is only one bathroom on each tier to be shared by all 50 people
12 on that tier. The single bathroom has only four urinals, four showers, and four
13 sinks. One urinal in the bathroom on my brother’s tier has been broken for several
14 weeks, so they share three urinals instead of the usual four. Everyone also shares
15 a single TV room and one phone. It is impossible to avoid personal contact in the
16 crowded hallways and shared spaces. Almost everyone in Unit F is sick, and people
17 have been transferring in and out of the unit frequently.

18 10. For around two weeks, Unit F has had no hot water. Prisoners have
19 been complaining daily about the lack of hot water, but nothing has been done.

20 11. Meals and medication are given to people housed in Unit F in the unit
21 lobby, and all 150 prisoners have to go to the lobby and stand in line to receive food
22 or medication. My brother says they are often waiting in line for some time before
23 they can pick up food and medication and are not able to practice social distancing
24 while in line.

25 12. My brother did not receive a mask until about two weeks ago. After
26 that, he was told that they would receive masks every week, but in practice it has
27 been closer to once every two weeks, and my brother and others around him have
28 had to reuse masks. The guards wear masks sometimes, but not always. My brother

1 has never received any gloves or eyewear, nor does he have access to hand sanitizer.

2 13. Throughout this time period, prisoners around my brother started
3 getting sick, first one by one and eventually in bunches at a time. My brother was
4 scared that he would become sick himself, and felt like nothing was being done to
5 stop the virus from spreading. He began to write a series of letters to myself and my
6 father to let us know what he was going through.

7 14. Attached hereto as **Exhibit A** is a true and accurate copy of a letter my
8 brother sent to me on April 18, 2020.

9 15. Attached hereto as **Exhibit B** is a true and accurate copy of a letter my
10 brother sent to me on April 21, 2020.

11 16. Attached hereto as **Exhibit C** is a true and accurate copy of a letter my
12 brother sent to me on April 23, 2020.

13 17. Attached hereto as **Exhibit D** is a true and accurate copy of a letter my
14 brother sent to me on April 28, 2020.

15 18. Attached hereto as **Exhibit E** is a true and accurate copy of a letter my
16 brother sent to me on April 29, 2020.

17 19. The final letter my brother sent to me was dated May 6, 2020. A true
18 and accurate copy is attached hereto as **Exhibit F**. In that letter, he told us that he
19 had tested positive for COVID-19.

20 20. My brother was tested for COVID-19 on April 28, 2020. On May 1,
21 2020, he was told that his results came out positive. That is the only time he has
22 been tested so far.

23 21. Since then, my brother has been experiencing symptoms, including
24 migraines, body chills, and frequent sweating in his sleep. He has not been given
25 any medication, any treatment, and nobody is monitoring his status. He has not
26 been able to talk to a doctor about how he is feeling, how bad his symptoms are
27 likely to become, or what his treatment options are.

28 22. My brother has simply been left in his housing unit with other sick

1 people, who are not receiving treatment either. New sick people keep arriving in his
2 unit. My brother and others in his unit feel that they have been abandoned and are
3 being left to die.

4 23. Although the prison has attempted to separate prisoners who have
5 tested positive from those who have tested negative, this separation did not take
6 place until five days after prisoners were tested, when the results for everyone had
7 come out. As a result, the virus may have spread to many prisoners who had tested
8 negative in the interim.

9 24. Since the virus began spreading here, my brother has not been
10 permitted to submit complaints to staff. Staff have claimed that they cannot deal
11 with complaints right now because they are too busy with COVID-19. My brother
12 has submitted three medical complaints to his case manager, but she has not
13 responded. On April 26, 2020, my brother submitted an application for
14 compassionate release to the Warden. He has not received a response.

15 25. If transferred to home confinement, my brother can self-quarantine at
16 my father's home at 1018 Elm Avenue, Modesto, California. There, he will have
17 access to doctors who are familiar with his medical history and conditions.

18 I declare under penalty of perjury under the laws of the United States of
19 America that the foregoing is true and correct.

20 Executed on May 15, 2020, at Hercules, California.

EXHIBIT A

4-18-20

Hey Bro,

The captain came to our unit on 4-16-20 and said there are 33 confirmed cases of covid 19 and 1 death. The news said there were 2 deaths here so far. He also said as of 4-16-20 we can no longer use the phones or computers until further notice. We are confined in these units and people are sick and they won't even tell the guards instead they are in denial and all they are doing is spreading it to everyone that comes in contact with them. As far as what I have done since I have been incarcerated, I have completed the non residential drug treatment program, the drug abuse program, Threshold re entry program, 2 parenting programs, ~~1000~~ Vocational training Electrical program, 3 college classes at Allan Hancock, I have completed 3 Alternative to Violence programs and have also taken one to become a facilitator for this program. I also facilitated an Alternative to Violence class. I became OSHA certified. I have completed KAIROS prison ministry class. I have also completed several other re entry classes. I have obtained my GED. I then went on to become a GED tutor. I took a training class to become a suicide cadre worker.

and then went on to become a suicide cadre worker. I have taken and completed over 30 classes and have received over 25 certificates. I currently work at UNICOR here at Terminal Island. The UNICOR here is electronic ~~recycling~~ ^{recycling}. I have worked my way up the ladder to the #1 position here. I have not had an incident report since incarcerated. I have kept busy since the day I came to prison to turn my life around and help others along the way. I am not a threat to society. I have a re-entry plan set in place. Ever since I have been incarcerated I have been diagnosed with hypertension. The medication I currently take is Lisinopril 20mg for hypertension HydroCHLOROthiazide 25mg for hypertension Atorvastatin for high cholesterol. The only way I can communicate with you is by mail until they let us use the phones and computers. If you mail me anything please send 2 copies because I am unable to copy anything right now. Thank you for all your help.

Love Your lil brother

Lance Wilson

P.S. before I got a job at UNICOR, I worked on the construction crew.

EXHIBIT B

4-21-20

Hey bro.

Things are getting so bad here they are not even letting us get forms to write the staff up. People are getting taken out of here on the daily because they are sick with the COVID 19 virus. They are setting us up for a death sentence. It was on the news today KCAL 9 that terminal island is having a deadly outbreak and the 3rd highest infection rate in the nation in federal prisons. Please help if you can. I know there is so many more people that have it but they are not testing us they are just keeping us locked up inside, we get no fresh air, no communication with our loved ones besides writing letters. They say the warden will be coming to each of our units twice a week and she is no where to be seen. My friend had to go to the hospital today because he was having the symptoms. We all use the same common bathroom, showers, water faucet and tv room. Write back to me if you can to make sure im still alive. Love Your Little Brother
Lance

P.S. the papers that you sent with
the 2241 motion that was ruled on
for the immigration cases can
you send me ~~the~~ a copy of the
motion they filed the case no is
20-cv-02064-MMC

The document you sent was
the response from the courts
would like to see the original
one that they filed. Thank you

EXHIBIT C

4-23-20

Hey bro

How is everything going? So the warden finally showed her face today. She just showed up to put some sign's on the walls about COVID-19. I asked her when are we going to be able to use the phones and computers so we can communicate with our loved ones and she said maybe by May 18 so until then i only will be able to communicate with you by mail. My pediatrician when i was young name was Dr Armand Hernandez. Remember he was the one that diagnosed me with Osgood Slaghter's disease lol. More and more cases of COVID 19 are popping up daily and it doesn't seem like it is getting any better. I sleep only 2 feet away from my celly. Well i hope you and the family is safe and out of harmsway.

Love Your lil brother

Lance

EXHIBIT D

4-28-20

Hey Bro,

So I got the compassionate release papers, I submitted it to the warden on Monday 4/27/20. So now I just have to wait and see if she responds to me. They tested everyone here at Terminal Island for the COVID-19 virus. We are waiting for the results, they said it takes 3 days. So far we have 236 positive cases of COVID-19. Is there anyway I can file a motion to the courts to get an emergency hearing to try and get released. I am being detained under circumstances that violate my due process rights, specifically "substantive due process right" to be free from conditions of confinement that amount to punishment or create an unreasonable risk to my safety and health. Get back to me when you can. Thank you for all of your help. Tell Saeg I said thank you too.

Love Your lil bro
Lance

EXHIBIT E

4-29-20

Hey Bro

How is everything going. Just to give you another update, As of today there is 570 inmates that have tested positive and 10 staff. It is all over all of the news stations out here. They are doing nothing to separate the sick from the healthy inmates. They are not responding to any of the cop outs to the case managers. They are keeping us from the grievance process and will not give us any grievance forms. People are sick all around me. They are giving us a death sentence. The ~~like~~ likelihood of becoming infected is enormous. The current conditions in this institution are inhumane. I'm asking please for your help. Love Your little brother

Lance

EXHIBIT F

Hey Bro

How are you and the family. So i got my results back from the COVID 19 test and it came back positive. The symptoms i have been having is migraine headaches and body chills. The guy in charge of health services over here right now said that there is 642 positive cases so far and 10 staff positive and 5 deaths. On may 9th we should be able to use the phones. I wrote a letter that i wanted to send to Region and Grand prairie. Do you think this is a good idea. The case manager that is in this unit i am in said i should and she gave me the address. I will enclose the letter if you can read it and see if i should send it and if so can you send it for me and just put my name and address on the envelopes. I was also thinking about sending a copy of the letter to the courts. Tell me what you think. Things are out of control over here we have been on the news every night. If you can look at Golstein investigations on the news out here. The address for Grand Prairie is

3416 Marine Forces Dr.
Grand Prairie Tx, 75051

The address for Region is

Federal Bureau of Prisons
Western Regional Office
7338 shoreline Dr.
Stockton CA 95219

Thank you for your help.

Love Your little Brother

Dear Sir or Ma'am:

I am an inmate at FCI-Terminal Island and I have been put through circumstances that violate my due process rights, specifically my "substantive due process right" to be free from "conditions of confinement that amount to punishment or create an unreasonable risk to my safety or health. For over a month inmates have been under stress, anxiety and hopelessness through the uncertainty of the current "global pandemic COVID 19". It is well known to the inmate population the instructions of the Department of Justice those who are eligible or who are at a greater risk of getting infected with the COVID 19 virus to be released to home confinement. While there is over 570 inmates infected with COVID 19 virus and 10 staff infected here with two deaths. You would think that this institution would move to do just that but the facts are very worrisome. For the first two weeks of April we were under this semi lockdown that is not reliable to allege a risk free environment. We have been kept

from a "grievance process", our cop-outs are not being answered and the casemanagers and counselors are nowhere to be found to address the home confinement opportunity. Presently i feel there is very little to no effort from the FCI staff to place inmates in home confinement and the inmates likelihood of becoming infected is enormous when introduced to confined spaces it can rapidly spread and indeed it has here at FCI Terminal Island. It is pertinent assessing in light of the present COVID19 Pandemic that the current conditions in this institution amount to punishment and or create an unreasonable risk to my safety and health. I have an underlying health condition which is hypertension. Additionally i was born with asthma, although im am only on medication for my high blood pressure and high cholesterol, my asthma does bother me from time to time. I have provided the warden and their staff with my home confinement address. I am a

first time non violent offender. I was the only one in my case with the minimal participant role. I have employment upon my release. I pose no threat or danger to the community. Lastly i have completed over 30 classes while incarcerated which include, GED, non residential drug treatment, 3 college courses, and over 10 re entry classes. I went on to become a GED tutor, suicide cadre worker and i currently work for UNICOR. I have never been in any trouble or ever received a write up. Please look into my complaint and direct this institution to place me in home confinement. Thank you for your time and consideration

Lance Wilson

EXHIBIT 2

DECLARATION OF JENNIFER VAN ATTA

I, Jennifer Van Atta, am over the age of 18 and fully competent to declare as follows:

1. My name is Jennifer Van Atta.

2. My husband is Maurice Smith. Maurice is 50 years old and is currently incarcerated at FCI Terminal Island in San Pedro, California. His BOP Register Number is 24299-298.

3. My husband has suffered from asthma since he was a child, is also pre-diabetic, and has hypertension.

4. On April 17, 2020, my husband was told that prisoners would not be able to use phones and computers until further notice. He has also been unable to make legal calls. My brother (husband) was allowed another five minute phone call on May 14, 2020. During this call, he consented to being a named plaintiff in this litigation. I make this declaration based on information conveyed to me by my husband over the phone before April 17 and through letters since then.

5. Before the outbreak began, my husband was housed in residential Unit B, an open-plan dorm with 60 prisoners. All 60 prisoners share 4 toilets, 4 sinks, and 3 showers. Two prisoners sleep in each bunk, and there is at most four feet of space between bunks.

6. Around April 14, 2020, my husband was moved to a makeshift living space in an old UNICOR warehouse. The warehouse was so unsanitary that it was simply not fit for human habitation. Mice, raccoons, wild cats, possums, and skunks all ran around the dirty concrete floor, and bats flew in through holes in the ceiling. Pigeons had nested inside, and were defecating on prisoners, who slept in fold-out lawn beds that were only three feet from the floor. The warehouse lacked potable water, hot water for showers, and any heating. My husband spent at least one night shivering uncontrollably and unable to sleep due to the cold. In addition, the

7. The Warden at Terminal Island has shown that she is indifferent to the suffering of my husband and other prisoners. My husband has personally addressed the Warden about his concerns, but was only told that the housing conditions met federal standards. My husband has also heard many of the staff complaining about the ineptness of prison leadership.

8. My husband was given one mask at the beginning of the outbreak, and has been reusing it ever since.

9. My husband has seen many of his fellow prisoners succumb to the virus. People who get sick often receive no treatment and are not removed from contact with my other inmates. Anyone with a temperature under 101 degrees is usually told to "hang in there" without treatment, no matter how sick they feel. My husband does his best to help sick people before they are finally taken away and given medical assistance.

10. Day after day, my husband hears news over the radio about more and more prisoners dying at Terminal Island. Having spoken to the Warden himself, he does not think that she or anyone else at the prison is willing or able to help him. He feels like a sitting duck, just waiting to be infected.

11. If transferred to home confinement, my husband would self-quarantine at my home, located at Carlsbad, CA. He would have access to medical personnel familiar with his medical conditions and history.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct.

Executed on May 14, 2020, at Carlsbad, CA.

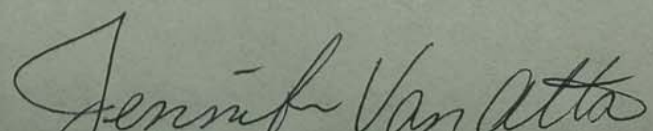

A handwritten signature in cursive script, reading "Jennifer Van Atta". The signature is written in dark ink on a light-colored background.

EXHIBIT 3

DECLARATION OF JACKELINE VAZQUEZ

I, Jackeline Vazquez, am over the age of 18 and fully competent to declare as follows:

1. My name is Jackeline Vazquez.

2. My brother is Edgar Vazquez. Edgar is 32 years old and is currently incarcerated at FCI Terminal Island in San Pedro, California. His BOP Register Number is 46907-007.

3. On April 16, 2020, my brother was told that prisoners would not be able to use phones and computers until further notice. He has also been unable to make legal calls. From then until May 10, 2020, the only way he has been able to communicate with myself and my father was through letters. On May 10, 2020, he was allowed one five-minute phone call. My brother was allowed another five minute phone call on May 14, 2020. During this call, he consented to being a named plaintiff in this litigation.

4. I make this declaration based on information conveyed to me by my brother through letters and over the phone.

5. Shortly after the outbreak at Terminal Island began, my brother was moved to a makeshift living space in an old UNICOR warehouse. The warehouse was infested with bats, pigeons, and cockroaches. It had no air conditioning, and 60 prisoners were packed into an open space and were made to share 3 showers and 3 toilets.

6. While at the warehouse, my brother began feeling sick. He became afraid that he had contracted COVID-19, and told prison staff that he needed immediate medical attention. Despite this, he was simply told to “hang in there” because his temperature was under 100 degrees.

7. Recently, my brother was moved to Unit J, an open-plan dormitory where he resides with 40 other prisoners. Prisoners in Unit J sleep only two feet apart from each other, making social distancing impossible. My brother understands

1 that all the people in Unit J have tested negative for COVID-19, and anyone who
2 later tests positive is moved out.

3 7. Prisoners try to clean the dormitory every day, but the only cleaning
4 supplies they have are watered down disinfectants, dirty mops, and dirty rags cut
5 from their own blankets.

6 8. In addition, Terminal Island is also experiencing an outbreak of scabies
7 – an infestation caused by tiny mites burrowing and laying eggs in the outer layer of
8 human skin. According to my brother, Scabies has been circulating in Terminal
9 Island for over a year, but the prison has not been able to keep the outbreak under
10 control.

11 9. My brother understands that prisoners at Terminal Island have been
12 experiencing significant delays in receiving any routine medical treatment not
13 related to COVID-19.

14 10. If transferred to home confinement, my brother would self-quarantine
15 at my house at [1516 Helen Belle Dr. Las Vegas, NV 89110]. He would have access
16 to medical personnel familiar with his medical history.

17 I declare under penalty of perjury under the laws of the United States of
18 America that the foregoing is true and correct.

19

EXHIBIT 4

DECLARATION OF STEPHEN RINES

I, Stephen Rines, hereby declare:

1. I am a petitioner in the above-captioned action. I make this declaration based on my own personal knowledge and if called to testify I could and would do so competently as follows:

2. I have asthma and was in wheelchair because of a spinal injury and have no feeling in my body below the waist. I was a prisoner at the federal prison at Terminal Island from about December 21, 2019, until my release on May 4, 2020. While I was there, I received totally inadequate medical care and observed practices that facilitated the transmission of COVID-19 and the staff and 1000+ prisoners at the prison.

3. Before going to Terminal Island, I was in the Metropolitan Detention Center awaiting sentencing on federal parole violation for failing to report to my parole officer. While I was in MDC, I had to be taken to the emergency room at White Memorial Medical Center because of problems I was having with my bladder. The doctor told me that my bladder had significant scarring and I had severe damage to my urethra. He set me up with a Foley Catheter to give my bladder and urethra a chance to heal. He also told me that in 30 days, I should see a urologist, have the Foley catheter removed and that I should use latex catheters thereafter.

4. I was sentenced to 8 months in prison and 18 months on supervised release and was taken to Terminal Island on or about December 21st. When I first arrived, I was put in a single cell in the special housing unit (SHU). I was supposed to have seen a urologist by late January and had my Foley Catheter removed, but that did not happen. Instead I developed an infection and had puss coming out of my penis. I moved from the SHU to the short stay hospital unit on about February 14, 2020, after I called my federal public defender to complain that I had not gotten my Foley removed and was developing an infection.

1 5. I did not get the Foley removed until after I was moved to the short stay
2 hospital unit and I was never given the right catheters. Instead of latex ones, I was
3 provided hard plastic ones that were too big, and using them has caused scarring in
4 my urethra and sphincter. I regularly asked the medical staff for the correct
5 catheters, and regularly responded “we have ordered them.” But I never got them.
6 Eventually, I was told that their delivery was delayed because of COVID-19. No
7 doctor ever examined my infection. Instead medical staff just handed me an
8 antibiotic with examining me or running any tests.

9 6. The short stay hospital unit had about nine rooms. Room 201 had three
10 hospital beds separated by curtain, Room 202 had three beds, Room 203 had
11 a single bed for someone with a handicap, Room 204 was a suicide watch room with
12 a single bed. Room 205 had two or three beds. I was initially housed in Room 207,
13 a suicide watch room with no handicap rails and no privacy. I was then moved to
14 Room 203.

15 7. While I was in the short stay hospital unit I saw and heard about
16 a variety of practices that clearly were not consistent with good public health and
17 efforts to prevent the transmission of COVID-19. I am very familiar with hospitals
18 and sound practices to prevent the risk of transmission contagious diseases from
19 those who have them to those who are not yet infected because I have worked in
20 ERs and ICUs as an electrician for many years. For example, I have had to work in
21 the room of a woman who was sick and highly contagious and in so doing I learned
22 the necessity of wearing personal protective equipment (PPE) into the room and
23 then “de-gowning” the over-clothes you were provided, rather than keeping them on
24 and bringing them into the next room I would be in to work on the electricity.

25 8. When I was in the short stay unit I observed that people coming back
26 from the hospital be placed into the room with two other people who returned from
27 the hospital on different days, thus defeating a lot of the purpose of quarantining.
28 That practice did not end till April 25, 2020. I also often heard nurses complain that

1 they simply did not have enough beds for people who were suspected of or had
2 tested positive for COVID-19. As a result, they would sometimes put someone who
3 was symptomatic but had not yet gotten test results back in a room on the short stay
4 unit and then move him back to general population so they could move in someone
5 who was sicker, potentially exposing everyone in the housing unit to the risk of
6 getting COVID-19.

7 9. Nurses also regularly complained about the shortage of PPE. I saw
8 nurses going into rooms of people who were suspected of having COVID wearing
9 gowns and then going into another room to see another patient without changing
10 their gowns. Nurses did not get masks and face shields until mid-March and did not
11 start changing gowns after leaving the room of someone suspected of having
12 COVID-19 until mid-April. I also had officers come into my room to escort to the
13 telephones on multiple occasions without wearing a mask. I did not get a mask until
14 April 25.

15 10. I also heard nurses complain about delays in moving people from the
16 short stay unit to the hospital. For example, I heard one nurse complain that she had
17 checked the blood oxygen level of someone suspected of having the virus, it was
18 low and his breathing was labored. She told me she had recommend that he
19 immediately be transferred to the off-site hospital. But, instead he was kept at the
20 short stay hospital unit for many hours before finally being taken to the hospital.

21 11. At no time while I was at Terminal Island ("TI") was I tested for
22 COVID. I was released on May 4. Two officers who were not wearing masks came
23 into my cell and escorted me to the release and delivery unit for processing for
24 release. I was told I was going to be transported home by bus so I asked for a N95
25 mask, but was refused. All I had was a flimsy cloth mask. Eventually two officers
26 took me in a wheelchair van to the Long Beach Greyhound Terminal but I had to
27 return to TI because they did not have the bus ticket for me that they were supposed
28 to have. Eventually they drove me to the crowded bus station at downtown LA,

1 where I caught a bus to Palmdale. During the whole trip I was worried I might
2 infect someone on the bus with COVID or vice versa.

3 12. At no point since I was released did anyone from BOP contact me to
4 see whether I had developed COVID symptoms or tested positive since leaving TI.
5 They also did not provide me with any latex catheters for my trip and transition back
6 to my community. They again provided the hard plastic catheters that scar my
7 bladder and urethra.

8 I declare under penalty of perjury under the laws of the United States that the
9 foregoing is true and correct.

EXHIBIT 5

DECLARATION OF SHAMSHER SAMRA, M.D.

I, Shamsheer Samra, declare as follows:

1. I am an Assistant Professor of Clinical Medicine at University of California, Los Angeles and a faculty member in the Department of Emergency Medicine at Harbor-UCLA. I work clinically in the LA County jails and participate in jail reentry programs in Los Angeles County. I am a physician trained in forensic medical evaluations through Physicians for Human Rights. I am a founding member of both the Harbor-Hospital Based Violence Intervention Program and Trauma Recovery Centers. I completed by residency in Emergency Medicine at the University of California, Los Angeles. I received my M.D. from Harvard Medical School. Attached as Exhibit A is my curriculum vitae.

2. COVID-19 is a serious disease that has reached pandemic status, and is straining the health care systems around the world. As of May 14, 2020, at least 1.3 million people in the United States had received confirmed diagnoses of COVID-19. At least 83,000 people have died in the United States. Approximately 71,000 of the confirmed cases were in California, with more than 2,900 having died.¹ These numbers will continue to increase, perhaps exponentially. Moreover, these figures must be considered in light of nationwide shortages of COVID-19 tests, meaning the actual numbers are likely significantly higher than those reported.

3. The Federal Bureau of Prison's website confirms that Terminal Island has an inmate population above 1,000 but a rated capacity of only 779, indicating that it is overcrowded.² As of May 14, 2020, BOP's website reports that there are

¹ Coronavirus Disease 2019, Centers for Disease Control and Prevention, available at <https://www.cdc.gov/coronavirus/2019-ncov/cases-updates/cases-in-us.html>

² Prison Rape Elimination Act Audit Report, Federal Bureau of Prisons, at page 6, available at https://www.bop.gov/locations/institutions/trm/prea_trm.pdf; Inmate Population Breakdown, Federal Bureau of Prisons, available at

1 a total of 712 people at Terminal Island who are currently or were recently positive
2 for COVID-19, including 130 prisoners and 15 staff currently deemed positive, and
3 567 inmates reported as being “recovered” after previously testing positive.³ The
4 reported numbers change daily, and the BOP website does not show what criteria it
5 is using to consider someone “recovered.” On May 11, 2020, just four days ago,
6 BOP was reporting that more than 690 prisoners were currently positive for
7 COVID-19. At least 8 prisoners have died at Terminal Island due to coronavirus.⁴

8 4. COVID-19 is a novel respiratory virus. It is spread primarily through
9 droplets generated when an infected person coughs or sneezes, or through droplets
10 of saliva or discharge from the nose. There is no vaccine for COVID-19, and there is
11 no cure for COVID-19. No one has prior immunity. The only way to control the
12 virus is to use preventive strategies, including social distancing.

13 5. The time course of the disease can be very rapid. Individuals can show
14 the first symptoms of infection in as few as two days after exposure and their
15 condition can seriously deteriorate in as few as five days (perhaps sooner) after that.
16 It is believed that people can transmit the virus without being symptomatic and,
17 indeed, that a significant amount of transmission may be from people who are
18 infected but asymptomatic or pre-symptomatic.

19 6. COVID-19 causes serious illness, with overall case fatality rates in the
20 United States so far estimated at 5.8%. An estimated 20% of those who become
21 infected and develop symptoms require significant medical intervention. While
22 certain medical conditions increase the probability of death from infection,
23

28 <https://www.bop.gov/coronavirus/>

1 otherwise perfectly healthy people are also vulnerable to COVID-19 and may die as
 2 a result. For example, adults age 20 to 44 account for 20% of all hospitalizations
 3 and 12% of ICU admissions.⁵

4 7. Treatment for serious cases of COVID-19 requires significant advanced
 5 support. In particular, appropriate supportive care often requires ventilator
 6 assistance for respiration and prone positioning if a patient's condition worsens
 7 despite intubation and ventilation. Furthermore, hospitals across the country are
 8 deploying a variety of drug regimens, including antivirals and immunomodulators, in
 9 search of the most effective remedy against COVID-19. It is essential that patients
 10 have immediate access to such advanced supportive care, because the condition of
 11 patients who require hospitalization often deteriorates in rapid fashion. For
 12 instance, approximately 50% develop hypoxemia (shortage of oxygen in the blood
 13 or shortage of oxygen) by the eighth day. And as many as 29% develop Acute
 14 Respiratory Distress Syndrome (ARDS).⁶ In addition to being a very lethal
 15 condition on its own, ARDS has a long and varied list of related complications that
 16 are as equally fatal: blood clots, collapsed lung, infections, and scarring of lung
 17 tissue.⁷ In sum, for those individuals who experience more severe symptoms from
 18 COVID-19, immediate and substantial medical intervention is required.

19 8. The effects of COVID-19 are especially serious for people who are
 20 most vulnerable. Vulnerable people include people over the age of 50, and those of
 21

28 ⁷ ARDS, Mayo Clinic, *available at* <https://www.mayoclinic.org/diseases-conditions/ards/symptoms-causes/syc-20355576>

1 any age with underlying health problems such as—but not limited to—weakened
2 immune systems (which can be caused by a variety of conditions, including but not
3 limited to cancer treatment, smoking, and immune weakening medications),
4 moderate to severe asthma, diabetes, hypertension, serious heart and lung disease,
5 severe obesity, liver disease, chronic kidney disease, and possibly pregnancy.⁸
6 While the CDC typically classifies only people 65 and older as vulnerable,
7 incarcerated individuals tend to be in poorer health than those in the general
8 population, justifying the use of an earlier cutoff in classifying people deemed
9 vulnerable to COVID-19.

10 9. Although individuals in the above-described populations are most
11 vulnerable, even younger and healthier people can suffer severe consequences. For
12 example, even healthier people who contract COVID-19 are susceptible to severe
13 strokes and may require supportive care, which includes supplemental oxygen,
14 positive pressure ventilation, and in extreme cases, extracorporeal mechanical
15 oxygenation.

16 10. The full extent of long-term sequela on cardio and cerebrovascular
17 diseases and other organ damage is unknown at this time in light of the novel nature
18 of COVID-19. However, preliminary evidence suggests COVID-19 may render
19 lasting organ damage in even minimally symptomatic or completely asymptomatic
20 patients. For example, COVID-19 can severely damage lung tissue, which requires
21 an extensive period of rehabilitation, and in some cases, can cause a permanent loss
22 of respiratory capacity. Furthermore, COVID-19 may target the heart muscle,
23 causing a medical condition called myocarditis, or inflammation of the heart muscle.
24 Myocarditis can affect the heart muscle and electrical system, reducing the heart's
25

26 ⁸ Coronavirus Disease 2019, Centers for Disease Control and Prevention,
27 available at [https://www.cdc.gov/coronavirus/2019-ncov/need-extra-](https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html)
28 [precautions/people-at-higher-risk.html](https://www.cdc.gov/coronavirus/2019-ncov/need-extra-precautions/people-at-higher-risk.html)

1 ability to pump. This reduction can lead to rapid or abnormal heart rhythms in the
 2 short term, and long-term heart failure that limits exercise tolerance and the ability
 3 to work.

4 11. In light of the above, an outbreak of COVID-19 could put significant
 5 pressure on or exceed the capacity of local health infrastructure. In the absence of
 6 a vaccine and a cure, a significant number of people who are infected with the virus
 7 will die. Buttressing these concerns, it is not yet clear whether people who have
 8 already been infected with COVID-19 gain immunity against future infection. To
 9 the extent that the health care infrastructure is overloaded, people will die
 10 unnecessarily because necessary respirators and hospital facilities are unavailable.

11 12. Public health authorities recommend a number of preventative steps to
 12 help prevent or decrease the spread of COVID-19, with perhaps the most important
 13 measure being social distancing. However, as the CDC and BOP both appear to
 14 acknowledge, correctional facilities are inherently limited in their abilities to
 15 implement such measures. For example, the BOP's modified operating directive is
 16 inadequate, in part, because it only requires social distancing "as much as
 17 practicable."⁹ Indeed, social distancing in ways that are recommended by public
 18 health officials can be difficult, if not impossible, in prisons, placing people at risk,
 19 especially when a facility is at or above population capacity. Therefore, even if the
 20 conditions at Terminal Island were ideal (which they are not) it would require
 21 a monumental effort to ensure the safety of prisoners and staff.

22 13. I understand the following to be allegations in the Complaint. If these
 23 allegations are confirmed true, the conditions at Terminal Island are deeply
 24 concerning:

- 25 • Terminal Island has a rated capacity of 779, but currently houses

27 ⁹ Modified Operating Directive, Federal Bureau of Prisons, *available at*
 28 https://www.bop.gov/coronavirus/covid19_status.jsp

1 over 1,000 prisoners.

- 2 • Terminal Island has nine residential units, five of which are large
3 communal open dormitories that house approximately 100-150
4 prisoners. Each of these dormitories contain long rows of double
5 bunk beds which are only 2-3 feet apart and not separated by
6 walls. Prisoners share communal bathrooms.
- 7 • Of the remainder, two residential units are double-occupancy
8 cells, where two prisoners share a room with beds only 2-3 feet
9 apart. Prisoners in the double-occupancy cells also share
10 communal bathrooms.
- 11 • Terminal Island staff have attempted to reduce overcrowding in
12 the residential units by moving prisoners into tents and
13 alternative housing units set up in warehouses. At least some of
14 these temporary units are unsanitary, with reports of broken
15 windows and ceiling leaks; infestations of rodents, bats, and
16 pigeons; no heat or running water; floors littered with feces; and
17 up to 60 prisoners sharing four sinks, four toilets, and four
18 showers.
- 19 • Only about half of staff are wearing masks. Masks were not
20 distributed to prisoners until late April. Prisoners are forced to
21 reuse a single cloth mask for at least one week. No other
22 personal protective equipment has been distributed. Only about
23 half of staff are wearing masks or other personal protective
24 equipment. Hand sanitizer also was not made available to
25 prisoners until late April.
- 26 • For weeks after its first positive cases, Terminal Island
27 maintained a policy of testing only symptomatic prisoners, even
28 though COVID-19 can be transmitted by asymptomatic or

1 pre-symptomatic individuals. This policy did not change even
 2 after April 15, 2020, when Terminal Island reported its first
 3 COVID-19 related death. Terminal Island only begin to test its
 4 entire prisoner population on or around April 28, when over half
 5 had already been confirmed as infected. Aside from that one-
 6 time test of the entire population, Terminal Island is not
 7 conducting any further testing, including prisoners who may
 8 have been exposed to infected persons or “recovered”
 9 COVID-19 patients before they return to the general population.

- 10 • Terminal Island’s efforts to isolate infected persons originally
 11 consisted of taking those who tested positive out of their
 12 residential units and isolating them in separate buildings. In
 13 carrying out this attempt at isolation, Terminal Island has
 14 frequently transferred prisoners, with one side effect being that
 15 prisoners have been exposed to three or more cellmates or
 16 bunkmates just within the weeks since the outbreak begin. There
 17 is now only one unit that has been designated as “clean,” or
 18 reserved for persons who have tested negative for COVID-19.
- 19 • Terminal Island’s outbreak started with a single staff member.
 20 By April 16, 2020, Terminal Island had 33 confirmed cases.
 21 Within two weeks, that number had climbed by more than
 22 1700%, with Terminal Island reporting 570 confirmed cases. As
 23 of May 10, 2020, approximately 60% of the prisoners had
 24 received positive diagnoses for COVID-19, with eight having
 25 died from complications relating to the illness. BOP currently
 26 reports that 130 prisoners at Terminal Island are positive and 567
 27 prisoners are “recovered.”
- 28 • Terminal Island is a Care Level 3 medical facility, designed to

1 “provid[e] specialized or long-term medical or mental health care
2 in a correctional environment.”¹⁰ According to BOP guidelines
3 on Care Level classification, “Care Level 3 inmates are
4 outpatients who have complex, and usually chronic, medical or
5 mental health conditions and who require frequent clinical
6 contacts to maintain control or stability of their condition.”¹¹

7 14. These conditions make it virtually impossible to ensure the safety of
8 prisoners who remain housed at the facility if the current course is maintained.
9 Even if the government made best efforts, effective social distancing is out of the
10 question. Indeed, this combination of factors practically ensures that all remaining
11 prisoners will eventually contract COVID-19 unless extraordinary measures are
12 taken now. As if more evidence were needed of Terminal Island’s inability to
13 ensure the safety of its prisoners, more than 60% of them have recently tested
14 positive for COVID-19. These failures are all the more alarming in light of
15 Terminal Island’s classification as a Level 3 Care facility designated specifically for
16 prisoners who have chronic underlying conditions.

17 15. Moreover, it is my understanding that BOP now contends that a
18 substantial number of the prisoners who recently tested positive have “recovered.”
19 To the extent these prisoners have actually recovered from the illness, that does not
20 absolve the need for preventive measures. In particular, it is not yet clear whether
21 people who have been infected develop immunity against future infection by
22 COVID-19.

23 16. Furthermore, I do not know how BOP has decided which prisoners to

24 _____
25 ¹⁰ Prison Rape Elimination Act Audit Report, Department of Justice, at page 2,
26 available at https://www.bop.gov/locations/institutions/trm/TRM_prea.pdf

27 ¹¹ Care Level Classification for Medical and Mental Health Conditions or
28 Disabilities, Federal Bureau of Prisons, at page 3, available at
https://www.bop.gov/resources/pdfs/care_level_classification_guide.pdf

1 classify as “recovered.” The need for continued rigorous preventive measures is
2 only heightened if BOP has not relied on appropriate methods for determining
3 whether prisoners have in fact recovered. In an ideal scenario, an individual would
4 only be deemed “recovered” after testing negative. Relying instead, for instance, on
5 patient reports of symptoms may not be sufficient in a correctional setting, where
6 prisoners may be reluctant to share information with staff. Furthermore,
7 asymptomatic individuals can still be carriers of the disease. And in a large
8 communal living space, where social distancing cannot be strictly adhered to,
9 individuals should be tested regularly in order to quickly identify and isolate anyone
10 who may contract COVID-19 before it spreads through the population.

11 17. I have also reviewed the declaration submitted by Jacques Wilson, the
12 brother of a prisoner, Lance Wilson (“Wilson”) housed in Unit F. In addition to
13 some of the representations above, the declarant indicates that: (1) prisoners stand in
14 line “for some time” in the lobby to receive meals and medications and that during
15 this they are unable to practice social distancing; (2) Wilson has had asthma most
16 his life and has been diagnosed with hypertension while incarcerated, for which he
17 is prescribed the medications Lisinopril and Hydrochlorothiazide; (3) Wilson was
18 informed on May 1 that he tested positive for COVID-19 and experienced
19 migraines, body chills, and frequent sweating in his sleep, but has not had any
20 treatment, monitoring, or access to a physician to discuss his prognosis or treatment
21 options; and (4) Wilson has been left in his regular housing unit, where none of the
22 other prisoners who have tested positive for COVID-19 are receiving treatment or
23 consultations with physicians.

24 18. Assuming these allegations are accurate, the health care delivery
25 system at Terminal Island is failing to provide the minimal level of acceptable care.
26 In addition to the noted failures to institute an effective regimen of social distancing,
27 Wilson’s declaration highlights the failure to monitor prisoners and to treat those
28 who have become infected—and even worse, have displayed notable symptoms.

1 Wilson paints a grim picture indeed, of outright failure to provide access to
2 physicians or any modicum of treatment. Particularly in light of Terminal Island's
3 status as a Level 3 Care facility, this is wholly inadequate.

4 19. Furthermore, based on the conditions depicted in the allegations from
5 the Complaint and Wilson's declaration, it is questionable whether the healthcare
6 system at Terminal Island is even capable of responding to the dire situation it now
7 faces. Indeed, vulnerable individuals—who comprise a larger portion of Terminal
8 Island's population than in the average prison—are at particularly high risk for
9 materially negative health consequences that will require aggressive and immediate
10 medical intervention. As a result, the treatment load at Terminal Island will be
11 greater than normal, because more prisoners will require severe medical
12 intervention. In the context of a very limited healthcare system at a prison facility
13 (and possible staffing shortages due to COVID-19 outbreak among staff), the
14 inability to swiftly identify those prisoners in need of substantial and proactive
15 medical intervention and either begin an appropriate treatment regimen or transport
16 them to a civilian hospital will only cause needless pain and deaths. And this
17 additional strain on the healthcare system does not even account for the already
18 substantial strain that exists at a facility like Terminal Island, where many prisoners
19 require regular medical treatment for chronic underlying conditions.

20 20. In light of the above, in my opinion BOP should take immediate steps
21 to dramatically downsize the population at Terminal Island, with priority given to
22 those at high risk of harm due to their age and health status and thus are likely to
23 require a disproportionate amount of medical resources. This will both allow
24 Terminal Island to implement more effective preventive and treatment measures
25 while simultaneously granting released or transferred prisoners access to minimally
26 acceptable living conditions.

27 21. Perhaps most importantly, downsizing will allow for more effective
28 social distancing measures at Terminal Island while simultaneously reducing the

1 strain placed on prison staff by the need to monitor and treat prisoners. Although
2 BOP has attempted to redress the overcrowding by way of temporary shelters, I am
3 informed that these makeshift dormitories are rife with sanitation problems that,
4 coupled with the communal living arrangement, means they are unlikely to
5 meaningfully slow or prevent the spread of COVID-19. In light of the already high
6 infection rates at Terminal Island, any reduction in prisoner population will also
7 allow prison staff to more closely monitor the conditions of infected prisoners for
8 signs that immediate medical intervention is required. Relatedly, the reduction in
9 population while implementing downsizing measures helps prevent overloading
10 prison staff such that they can continue to ensure the safety of incarcerated people.

11 22. Furthermore, immediate downsizing that prioritizes prisoners who are
12 elderly and those with underlying health conditions reduces the likelihood they will
13 contract the disease (either for a first or subsequent time) or suffer severe medical
14 consequences as a result of being infected. Reducing the spread and severity of
15 infection in a prison slows, if not reduces, the number of people who will become ill
16 enough to require hospitalization, which in turn reduces the strain on local
17 community resources and infrastructure.

18 23. Downsizing from a facility with infection rates as high as Terminal
19 Island may be done safely, minimizing the risk of increasing infection rates in the
20 community. In particular, it is imperative that prisoners be tested prior to release.
21 But even prisoners who receive confirmed diagnoses of COVID-19 may be safely
22 released to the community. If they are asymptomatic, they must be required to self-
23 quarantine and follow other recommendations of public health officials. If they are
24 experiencing symptoms, they will likely receive superior healthcare if released from
25 custody due to the present conditions at Terminal Island.

26 24. The above measures, especially if implemented immediately, can slow
27 or stop the spread of infection (or re-infection) and ensure appropriate and proactive
28 treatment of infected prisoners, to the benefit of prisoners and staff and, ultimately,

1 the community at large.

2 25. In addition to downsizing, and to the extent they are not already being
3 implemented, the following steps should immediately be mandated of the
4 Respondents in order to protect any prisoners who remain in custody:

5 a. Social Distancing. The prison must ensure that prisoners are
6 able to maintain adequate social distancing during required or necessary activities,
7 such as collecting food, eating, and receiving medications.

8 b. Immediate and Continued Testing. Patients (both staff and
9 prisoners) who require testing, based on public health recommendations and the
10 opinion of a qualified medical professional, should be tested for COVID-19,
11 including to the extent public health recommendations call for continued (or repeat)
12 testing of individuals who have previously been tested.

13 c. Immediate Screening. Defendants must be required to screen
14 each employee or other person entering the facility every day to detect fever over
15 100 degrees, cough, shortness of breath, and/or exposure to someone who is
16 symptomatic or under surveillance for COVID-19 or screening as required by public
17 health authorities. A record should be made of each screening.

18 d. Quarantine. The prison must establish non-punitive quarantine
19 for all individuals believed to have been exposed to COVID-19, but not yet
20 symptomatic, and non-punitive isolation for those believed to be infected with
21 COVID-19 and potentially infectious. Any individual who must interact with those
22 potentially or likely inflicted with COVID-19 must utilize protective equipment as
23 directed by public health authorities. In short, every possible effort must be made to
24 separate infected or potentially infected individuals from the rest of the incarcerated
25 population and each other.

26 e. Institutional Hygiene. The prison must be required to provide
27 adequate disinfection of all high-touch areas and cells.

28 f. Personal Hygiene. The prison must be required to provide hand

1 soap, disposable paper towels, and access to water to allow prisoners to wash their
2 hands on a regular basis, free of charge and ensure replacement products are
3 available as needed. Further, hand sanitizer with alcohol must be declassified
4 temporarily as contraband. Correctional staff should be allowed to carry hand
5 sanitizer with alcohol on their person, and prisoners should be allowed to use hand
6 sanitizer with alcohol when they are in locations or activities where hand washing is
7 not available. Prisoners should also be permitted daily access to showers and clean
8 laundry. Correctional officers should be required to wear personal protective
9 equipment, consistent with the CDC guidance, including masks and gloves, when
10 interacting with any person or when touching surfaces in cells or common areas.
11 Finally, correctional officers should also wash their hands, use hand sanitizer, or
12 change their gloves both before and after interacting with any person or touching
13 surfaces in cells or common areas.

14 g. Waive Copays. There must be a waiving of copays for medical
15 evaluation and care related in any way to COVID-19 and/or its symptoms.
16 A waiver of these types of copays is necessary to avoid disincentivizing patients
17 from requesting medical treatment. Patients with symptoms of possible COVID-19
18 should be seen quickly.

19 h. Personal Protective Equipment. Those prisoners with a cough
20 should be provided masks as soon as they inform staff of this symptom or staff
21 notice this symptom. Staff should also be required to wear facemasks, gowns or
22 other body coverings, eye protection, and gloves.

23 i. Supply Chain. The prison must be required to identify the
24 supplies and other materials upon which the institution is dependent, such as food,
25 medical supplies, certain medicines, cleaning products, etc., and prepare for
26 shortages, delays or disruptions in the supply chain.

27 26. In sum, reducing the number of individuals imprisoned at Terminal
28 Island immediately is necessary for the health and safety of the prisons and our

1 communities. This population reduction should begin with the most medically
2 vulnerable which includes those over age 50 and those with CDC-defined
3 underlying health conditions.

4 I declare under penalty of perjury under the laws of the United States that the
5 foregoing is true and correct.

SHAMSHER SAMRA, M.D.

EXHIBIT A

Shamsher Samra, MD, MPhil

CURRICULUM VITAE

PERSONAL HISTORY:

Business address: Harbor-UCLA Medical Center
Division of
1000 West Carson Street
Torrance, California 90509
Work Phone (310) 269-3923
e-mail: ssamra@dhs.lacounty.gov

Home address: 27 Westminster Ave
Venice, California 90291
Home Phone: (559) 269-3923

Date of Birth: May 5, 1986
Place of Birth: Los Angeles, California
Citizenship: U.S. Citizen

EDUCATION and TRAINING:

Stanford University, Stanford, California B.S., Biological Sciences	8/04-06/07
Cambridge University, Cambridge, UK MPhil, Development Studies Gates Cambridge Fellowship	08/07-06/08
Harvard Medical School, Boston, Massachusetts MD	08/08-06/13
Harvard Kennedy School of Government Urban Policy and Human Rights	08/14-12/14
UCLA Medical Center-Olive View Medical Center Residency: Emergency Medicine	07/13-06/17
Chief Resident UCLA Medical Center-Olive View Medical Center Residency: Emergency Medicine	07/16-06/17

LICENSURE:

State of California, A134884 02/15 -

Shamsher Samra MD, MPhil

Drug Enforcement Agency 02/15 -

CERTIFICATION:

Diplomate, American Board of Emergency Medicine 06/14/18

PROFESSIONAL EXPERIENCE:

Assistant Professor Emergency Medicine 08/17 -
 Harbor-UCLA Medical Center
 Los Angeles, California

Attending Physician Correctional Health Services 08/17-
 Twin Towers Correctional Facility
 Los Angeles, California

Medical Director Whole Person Care Reentry 08/18 –
 Department of Health Services
 Los Angeles, California

Course Director Introduction to Social Medicine 09/18 –
 UCLA David Geffen School of Medicine
 Los Angeles, California

Co-Director Trauma Recovery Center 12/17-
 Harbor-UCLA Medical Center
 Torrance, California

Co-Director Hospital Based Violence Intervention Program 3/19 -
 Harbor-UCLA Medical Center
 Torrance, California

PROFESSIONAL ACTIVITIES:

Committee Services

1. UCLA International and Domestic Health Equity 01/17 -
2. Correctional Health Services Care Transitions 08/17 -
3. Whole Person Care Delivery Systems Integration 01/18 – 06/19
4. Whole Person Care Clinical Innovations 01/18 – 06/19
5. Hospital Based Violence Intervention Consortium 12/18 –
6. DPH Trauma Prevention Initiative 06/18 –
7. Harbor UCLA Diversity Committee 06/18 -
8. Harbor Supports Undocumented Patients 06/18 -
9. Los Angeles Office of Violence Prevention 06/19 -
10. Co- Lead Los Angeles Hospital Based Violence Intervention Consortium 06/19 -

Community Service

EXHIBIT 6

1 **DECLARATION OF MARC STERN, M.D.**

2 I, Marc Stern, declare as follows:

3 1. I am a physician, board-certified in internal medicine, specializing in
4 correctional health care. I most recently served as the Assistant Secretary for Health
5 Care at the Washington State Department of Corrections. I served for four years as
6 a medical subject matter expert for the Officer of Civil Rights and Civil Liberties,
7 U.S. Department of Homeland Security, and as a medical subject matter expert for
8 one year for the California Attorney General's division responsible for monitoring
9 the conditions of confinement in Immigration and Customs Enforcement (ICE)
10 detention facilities. I am a court-appointed medical expert in the class action
11 *Parsons v. Ryan*, CV-12-00601-PHX-ROS. Currently, I am the Medical Advisor for
12 the National Sheriffs' Association on matters related to preventive measures
13 responding to COVID-19. Additionally, in 2009, at the request of the California
14 Receiver Clark Kelso, I toured 10 California state prisons to assess whether or not
15 the Receiver's assignment—to restore the delivery of health services within the
16 California state prisons to constitutionally adequate levels—had been completed.
17 Attached as Exhibit A is a copy of my curriculum vitae.

18 2. COVID-19 is a serious disease that has reached pandemic status, and is
19 straining the health care systems around the world. As of May 15, 2020, at least
20 1.3 million people in the United States had received confirmed diagnoses of
21 COVID-19. At least 83,000 people have died in the United States. Approximately
22 71,000 of the confirmed cases were in California, with more than 2,900 having died.
23 These numbers will continue to increase, perhaps exponentially. Moreover, these
24 figures must be considered in light of nationwide shortages of COVID-19 tests,
25 meaning the actual numbers are likely significantly higher than those reported.

26 3. Terminal Island has a population above 1,000 but a rated capacity of
27 only 779, indicating that it is overcrowded. As of May 15, 2020, the Federal Bureau
28 of Prison's ("BOP") website reports that there is a total of 712 people at Terminal

1 Island who are currently or were recently positive for COVID-19, including
2 130 residents and 15 staff currently deemed positive, eight resident deaths, and
3 567 residents reported as being “recovered” after previously testing positive. The
4 BOP website does not show what criteria it is using to consider someone
5 “recovered.”

6 4. COVID-19 is a novel respiratory virus. It is spread primarily through
7 droplets generated when an infected person coughs or sneezes, or through droplets
8 of saliva or discharge from the nose. There is no vaccine for COVID-19, and there is
9 no cure for COVID-19. No one has prior immunity. The only way to control the
10 virus is to use preventive strategies, including social distancing.

11 5. The time course of the disease can be very rapid. Individuals can show
12 the first symptoms of infection in as few as two days after exposure and their
13 condition can seriously deteriorate in as few as five days (perhaps sooner) after that.
14 It is believed that people can transmit the virus without being symptomatic and,
15 indeed, that a significant amount of transmission may be from people who are
16 infected but asymptomatic or pre-symptomatic.

17 6. Treatment for serious cases of COVID-19 requires immediate and
18 substantial medical intervention.

19 7. The effects of COVID-19 are especially serious for people who are
20 most vulnerable. Vulnerable people include people over the age of 50, and those of
21 any age with underlying health problems such as—but not limited to—weakened
22 immune systems (which can be caused by a variety of conditions, including but not
23 limited to cancer treatment, smoking, and immune weakening medications),
24 moderate to severe asthma, diabetes, serious heart and lung disease, severe obesity,
25 liver disease, and possibly pregnancy. While the CDC typically classifies only
26 people 65 and older as vulnerable, incarcerated individuals tend to be in poorer
27 health than those in the general population, justifying the use of an earlier cutoff in
28 classifying people deemed vulnerable to COVID-19.

1 8. In light of the above, an outbreak of COVID-19 could put significant
2 pressure on or exceed the capacity of local health infrastructure. In the absence of a
3 vaccine and a cure, a significant number of people who are infected with the virus
4 will die. Buttressing these concerns, it is not yet clear whether people who have
5 already been infected with COVID-19 gain immunity against future infection. To
6 the extent that the health care infrastructure is overloaded, people will die
7 unnecessarily because necessary respirators and hospital facilities are unavailable.

8 9. Public health authorities recommend a number of preventive steps to
9 help prevent or decrease the spread of COVID-19, with perhaps the most important
10 measure being social distancing.

11 10. Prisons are congregate environments, *i.e.*, places where people live and
12 sleep in close proximity. Many people live in dormitory-style units with multiple
13 rows of bunk beds close together or in small multi-person cells that often surround
14 common areas where incarcerated people crowd together during the day. Social
15 distancing in ways that are recommended by public health officials can be difficult,
16 if not impossible, in prisons, even when the population is under design capacity.
17 When prisons are at or above capacity, it becomes even more difficult to implement
18 appropriate social distancing measures.

19 11. Infectious diseases that are transmitted via the air or touch (like
20 COVID-19) are more likely to spread, placing people at risk. For these reasons, if—
21 but more likely when—COVID-19 is introduced into a prison, the risks of spread is
22 greatly, if not exponentially, increased as already evidenced by spread of COVID-19
23 in two other congregate environments: nursing homes and cruise ships.

24 12. But prisons actually have an attribute that makes them more dangerous
25 than cruise ships. Unlike cruise ships, prisons are not closed systems. Staff, new
26 detainees, attorneys, and inanimate objects—all potential vectors for virus—are
27 introduced into the system every day. Thus, even if the government makes best
28 efforts to follow preventive guidelines, the introduction of virus into a detention

center is almost inevitable. Moreover, because staff and some visitors travel each day from the facilities back to their homes, when infection develops in the facility, there is also significant risk that the infection will be transmitted *outside the facility*, to the family and friends of staff and visitors. In short, the risks that confront individuals at detention facilities such as Terminal Island stem from their very nature as congregate environments. Even if the healthcare provided were excellent, there would still be substantial risk; if the healthcare provided were substandard, those substantial risks are only elevated.

13. I understand the following to be allegations in the Complaint. If these allegations are confirmed true, the conditions at Terminal Island are deeply concerning:

- Terminal Island has a rated capacity of 779, but currently houses over 1,000 residents.
- Terminal Island has nine residential units, five of which are large open dormitories that house approximately 100-150 residents. Each of these dormitories contain long rows of double bunk beds which are only two to three feet apart and not separated by walls. Residents share communal bathrooms.
- Of the remainder, two residential units are double-occupancy cells, where two residents share a room with beds only two to three feet apart. Residents in the double-occupancy cells also share communal bathrooms.
- Terminal Island staff have attempted to reduce overcrowding in the residential units by moving residents into tents and alternative housing units set up in warehouses. At least some of these temporary units are unsanitary, with reports of broken windows and ceiling leaks; infestations of rodents, bats, and pigeons; no heat or running water; floors littered with feces; and

up to 60 residents sharing four sinks, four toilets, and four showers.

- Only about half of staff are wearing masks.
- Terminal Island is not conducting any testing of residents who are “recovered” before they return to the general population.
- Terminal Island’s outbreak started with a single staff member. By April 16, 2020, Terminal Island had 33 confirmed cases. Within two weeks, that number had climbed by more than 1700%, with Terminal Island reporting 570 confirmed cases. As of May 10, 2020, approximately 60% of the residents had received positive diagnoses for COVID-19, with seven having died from complications relating to the illness. BOP currently reports that 130 residents at Terminal Island are positive and 567 are “recovered.”
- Terminal Island is a Care Level 3 medical facility, designed to “provid[e] specialized or long-term medical or mental health care in a correctional environment.” According to BOP guidelines on Care Level classification, “Care Level 3 inmates are outpatients who have complex, and usually chronic, medical or mental health conditions and who require frequent clinical contacts to maintain control or stability of their condition.”

14. These conditions, if true—a track record of not being able to prevent predictable and widespread infection, continued widespread infection, unsanitary living conditions, unavailability of running water in living areas, inadequate testing, and most importantly overcrowding—make it exceedingly difficult, if not impossible, to ensure the safety of residents who remain housed at the facility. In particular, these conditions mean that social distancing is very difficult, if not impossible, to effectively implement.

1 15. I have also reviewed an excerpt of a declaration from Jacques Wilson,
2 the brother of a resident, Lance Wilson housed in Unit F. In addition to some of the
3 representations above, the declarant indicates that: (1) residents stand in line “for
4 some time” in the lobby to receive meals and medications and during this they are
5 unable to practice social distancing; (2) Wilson was informed on May 1 that he
6 tested positive for COVID-19 and since that time has been experiencing migraines,
7 body chills, and frequent sweating in his sleep, but has not had any treatment,
8 monitoring, or access to a physician to discuss his prognosis or treatment options.

9 16. I cannot draw any conclusions from a single second-hand report.
10 However, if these allegations were found to be accurate, and if they were found to
11 be representative of the system of health care delivery operating at Terminal Island,
12 I would likely draw the following conclusions: (1) Terminal Island operators are
13 exposing residents to a significant risk of harm by ensuring that residents cannot
14 socially distance; (2) The health care delivery system at Terminal Island is currently
15 unable to provide minimally safe health care, *i.e.*, the current system poses a
16 significant risk of serious harm to residents, a risk that will only increase as more
17 residents become symptomatic from COVID-19 or the condition of symptomatic
18 residents deteriorates as their disease progresses.

19 17. If the second conclusion above were true, I would need more
20 information through discovery to determine the cause(s). However, based on my
21 experience operating, evaluating, and monitoring correctional health care systems, it
22 would likely be the result of one or more of the following factors: insufficient
23 number of staff; inappropriate types of staff (for example, using licensed vocational
24 nurses, performing beyond their licensed scope of practice, to carry out the duties of
25 a registered nurse); insufficient training; and insufficient supervision. For these
26 reasons, I recommend consideration of a concerted effort to downsize the population
27 of Terminal Island to the lowest number possible immediately, with priority given to
28 those at high risk of harm due to their age and health status. This will both allow

1 Terminal Island to implement more effective preventive and treatment measures
2 while simultaneously granting released or transferred residents access to minimally
3 acceptable living conditions. To maximize their effectiveness in reducing the spread
4 and impact of the virus at Terminal Island, these downsizing measures must be
5 implemented now.

6 18. There are two values to immediate downsizing. First, downsizing will
7 reduce Terminal Island's density of congregation. This will allow people in prison
8 to maintain better social distancing. The reduction in population will also make it
9 easier for prison authorities to implement infection prevention measures such as:
10 provision of cleaning supplies to residents; frequent laundering of towels and
11 clothes; provision of soap for handwashing; frequent cleaning of transactional
12 surfaces; etc. Furthermore, downsizing will allow prison health care professionals to
13 devote their attention to a smaller number of residents, potentially improving the
14 quality of care those residents receive. At any prison, but especially a Level 3 care
15 facility like Terminal Island where residents with other underlying conditions
16 requiring treatment are intentionally housed, it is beneficial to conserve medical
17 resources in the face of a pandemic such as the one we presently face. All these
18 steps can slow or stop the spread of infection (or re-infection) and improve
19 treatment outcomes if they are currently inadequate, to the benefit of residents and
20 staff and, ultimately, the community at large.

21 19. Second, immediate downsizing that prioritizes residents who are
22 elderly and those with underlying health conditions reduces the likelihood they will
23 contract the disease or suffer severe medical consequences as a result of being
24 infected. Individuals in these groups are at the highest risk of severe complications
25 from COVID-19 and when they develop severe complications they will be
26 transported to community hospitals. Reducing the spread and severity of infection in
27 a prison slows, if not reduces, the number of people who will become ill enough to
28 require hospitalization where they will be using scarce community resources (ER

1 beds, general hospital beds, ICU beds) which also in turn reduces the health and
2 economic burden to the local community at large. Indeed, in light of the new reality
3 in which we operate, decisions to release residents from custody—traditionally
4 concerned primarily with public safety—must also take into account the impact on
5 public health. It is for this reason that release or transfer¹ of at-risk residents not only
6 reduces their risk of death, but also increases public safety when the impact on
7 public health is also considered.

8 20. Residents who have received confirmed diagnoses of COVID-19 in
9 most cases may be safely released to the community, where they can quarantine or
10 isolate at home. To the extent that the quality of care these residents currently
11 receive is inadequate, release would also ensure that residents have access to better
12 health care.

13 21. In addition to the downsizing described above, and to the extent they
14 are not already being implemented, the following steps should immediately be
15 mandated of the Respondents in order to protect any residents who remain in
16 custody:

17 a. Social Distancing. The prison must ensure that residents are able
18 to maintain adequate social distancing during required or necessary activities, such
19 as collecting food, eating, and receiving medications.

20 b. Immediate and Continued Testing. Patients (both staff and
21 residents) who require testing (or re-testing) based on public health
22 recommendations and the opinion of a qualified medical professional, should be
23 tested for COVID-19.

24 c. Immediate Screening. Defendants must be required to screen
25

26 _____
27 ¹ Transfer is only acceptable if the transfer itself does not pose significant risks and
28 is a transfer to another facility where the quality of health care and COVID-19
precautions are safe.

1 each employee or other person entering the facility every day to detect fever over
2 100 degrees, cough, shortness of breath, other symptoms as currently recommended
3 by CDC, and exposure to someone who is symptomatic or under surveillance for
4 COVID-19, or screening as required by public health authorities. A record should be
5 made of each screening.

6 d. Quarantine. The prison must establish non-punitive quarantine
7 for all individuals believed to have been exposed to COVID-19, but not yet
8 symptomatic, and non-punitive isolation for those believed to be infected with
9 COVID-19 and potentially infectious. Any individual who must interact with those
10 potentially or likely inflicted with COVID-19 must utilize protective equipment as
11 directed by public health authorities. In short, every possible effort must be made to
12 separate infected or potentially infected individuals from the rest of the incarcerated
13 population and each other.

14 e. Post-Isolation or Quarantine. Individuals should only be released
15 from quarantine or isolation in accordance with CDC guidelines as modified by
16 local public health authorities, after which they should be monitored in accordance
17 with those same guidelines.

18 f. Institutional Hygiene. The prison must be required to provide
19 adequate disinfection of all high-touch areas and cells.

20 g. Personal Hygiene. The prison must be required to provide hand
21 soap, disposable paper towels, and access to water to allow residents to wash their
22 hands on a regular basis, free of charge, and ensure replacement products are
23 available as needed. Correctional staff should be allowed to carry hand sanitizer
24 with alcohol on their person, and residents should be allowed to use hand sanitizer
25 with alcohol when they are in locations or activities where hand washing is not
26 available. Correctional officers should be required to wear personal protective
27 equipment and perform hand hygiene when appropriate, consistent with the CDC
28 guidance as modified by local health authorities

h. Waive Copays. There must be a waiving of copays for medical evaluation and care related in any way to COVID-19 and/or its symptoms. A waiver of these types of copays is necessary to avoid disincentivizing patients from requesting medical treatment. Patients with symptoms of possible COVID-19 should be seen quickly.

i. Access to Care. All residents should have timely access to an appropriately qualified health care professional.

j. Personal Protective Equipment. Those residents with a cough should be provided masks as soon as they inform staff of this symptom or staff notice this symptom.

k. Supply Chain. The prison must be required to identify the supplies and other materials upon which the institution is dependent, such as food, medical supplies, certain medicines, cleaning products, etc., and prepare for shortages, delays or disruptions in the supply chain.

22. Thus, in summary, consideration should be given to immediately reducing the number of individuals imprisoned at Terminal Island immediately for the health and safety of the prisons and our communities, taking into account the *totality* of risk posed to the public safety by each individual. This population reduction should begin with the most medically vulnerable which includes those over age 50 and those with CDC-defined underlying health conditions.

I declare under penalty of perjury under the laws of the United States that the foregoing is true and correct.

Executed May 15, 2020, at Tumwater, Washington.

SUMMARY OF EXPERIENCE

CORRECTIONAL HEALTH CARE CONSULTANT

2009 – PRESENT

Consultant in the design, management, and operation of health services in a correctional setting to assist in evaluating, monitoring, or providing evidence-based, cost-effective care consistent with constitutional mandates of quality.

Current activities include:

- COVID-19 Medical Advisor, National Sheriffs Association (2020 -)
- Advisor to various jails in Washington State on patient safety, health systems, and related health care and custody staff activities and operations, and RFP and contract generation (2014 -)
- Consultant to the US Department of Justice, Civil Rights Division, Special Litigation Section. Providing investigative support and expert medical services pursuant to complaints regarding care delivered in any US jail, prison, or detention facility. (2010 -) (no current open cases)
- Physician prescriber/trainer for administration of naloxone by law enforcement officers for the Olympia, Tumwater, Lacey, Yelm, and Evergreen College Police Departments (2017 -)
- Consultant to the Civil Rights Enforcement Section, Office of the Attorney General of California, under SB 29, to review the healthcare-related conditions of confinement of detainees confined by Immigration and Customs Enforcement in California facilities (2017 -)
- Rule 706 Expert to the Court, US District Court for the District of Arizona, in the matter of Parsons v. Ryan (2018 -)

Previous activities include:

- Consultant to Human Rights Watch to evaluate medical care of immigrants in Homeland Security detention (2016 - 2018)
- Consultant to Broward County Sheriff to help develop and evaluate responses to a request for proposals (2017 - 2018)
- Member of monitoring team (medical expert) pursuant to Consent Agreement between US Department of Justice and Miami-Dade County (Unites States of America v Miami-Dade County, *et al.*) regarding, *entre outre*, unconstitutional medical care. (2013 - 2016)
- Jointly appointed Consultant to the parties in Flynn v Walker (formerly Flynn v Doyle), a class action lawsuit before the US Federal District Court (Eastern District of Wisconsin) regarding Eighth Amendment violations of the health care provided to women at the Taycheedah Correctional Institute. Responsible for monitoring compliance with the medical component of the settlement. (2010 - 2015)
- Consultant on “Drug-related Death after Prison Release,” a research grant continuing work with Dr. Ingrid Binswanger, University of Colorado, Denver, examining the causes of, and methods of reducing deaths after release from prison to the community. National Institutes of Health Grant R21 DA031041-01. (2011 - 2016)
- Consultant to the US Department of Homeland Security, Office for Civil Rights and Civil Liberties. Providing investigative support and expert medical services pursuant to complaints regarding care received by immigration detainees in the custody of U.S. Immigration and Customs Enforcement. (2009 - 2014)
- Special Master for the US Federal District Court (District of Idaho) in Balla v Idaho State Board of Correction, *et al.*, a class action lawsuit alleging Eighth Amendment violations in provision of health care at the Idaho State Correctional Institution. (2011 - 2012)
- Facilitator/Consultant to the US Department of Justice, Office of Justice Programs, Bureau of Justice Statistics, providing assistance and input for the development of the first National Survey of Prisoner Health. (2010-2011)
- Project lead and primary author of National Institute of Corrections’ project entitled “Correctional Health Care Executive Curriculum Development,” in collaboration with National Commission on Correctional Health Care. NIC commissioned this curriculum for its use to train executive leaders from jails and prisons across the nation to better manage the health care missions of their facilities. Cooperative Agreement 11AD11GK18, US Department of Justice, National Institute of Corrections. (2011 - 2015)

- Co-teacher, with Jaye Anno, Ph.D., for the National Commission on Correctional Health Care, of the Commission's standing course, *An In-Depth Look at NCCHC's 2008 Standards for Health Services in Prisons and Jails* taught at its national meetings. (2010 - 2013)
- Contributor to 2014 Editions of Standards for Health Services in Jails and Standards for Health Services in Prisons, National Commission on Correctional Health Care. (2013)
- Consultant to the California Department of Corrections and Rehabilitation court-appointed Receiver for medical operations. Projects included:
 - Assessing the Receiver's progress in completing its goal of bringing medical care delivered in the Department to a constitutionally mandated level. (2009)
 - Providing physician leadership to the Telemedicine Program Manager tasked with improving and expanding the statewide use of telemedicine. (2009)
- Conceived, co-designed, led, and instructed in American College of Correctional Physicians and National Commission on Correctional Health Care's Medical Directors Boot Camp (now called Leadership Institute), a national training program for new (Track "101") and more experienced (Track "201") prison and jail medical directors. (2009 - 2012)
- Participated as a member of a nine-person Delphi expert consensus panel convened by Rand Corporation to create a set of correctional health care quality standards. (2009)
- Convened a coalition of jails, Federally Qualified Health Centers, and community mental health centers in ten counties in Washington State to apply for a federal grant to create an electronic network among the participants that will share prescription information for the correctional population as they move among these three venues. (2009 - 2010)
- Participated as a clinical expert in comprehensive assessment of Michigan Department of Corrections as part of a team from the National Commission on Correctional Health Care. (2007)
- Provided consultation to Correctional Medical Services, Inc., St. Louis (now Corizon), on issues related to development of an electronic health record. (2001)
- Reviewed cases of possible professional misconduct for the Office of Professional Medical Conduct of the New York State Department of Health. (1999 - 2001)
- Advised Deputy Commissioner, Indiana State Board of Health, on developing plan to reduce morbidity from chronic diseases using available databases. (1992)
- Provided consultation to Division of General Medicine, University of Nevada at Reno, to help develop a new clinical practice site combining a faculty practice and a supervised resident clinic. (1991)

OLYMPIA BUPRENORPHINE CLINIC, OLYMPIA, WASHINGTON**2019 - PRESENT**

Volunteer practitioner at a low-barrier clinic to providing Medication Assisted Treatment (buprenorphine) to opioid dependent individuals wishing to begin treatment, until they can transition to a long-term treatment provider

OLYMPIA FREE CLINIC, OLYMPIA, WASHINGTON**2017 - PRESENT**

Volunteer practitioner providing episodic care at a neighborhood clinic which provides free care to individuals without health insurance until they can find a permanent medical home

OLYMPIA UNION GOSPEL MISSION CLINIC, OLYMPIA, WASHINGTON**2009 - 2014**

Volunteer practitioner providing primary care at a neighborhood clinic which provides free care to individuals without health insurance until they can find a permanent medical home; my own patient panel within the practice focuses on individuals recently released jail and prison.

WASHINGTON STATE DEPARTMENT OF CORRECTIONS**2002 - 2008**

Assistant Secretary for Health Services/Health Services Director, 2005 - 2008

Associate Deputy Secretary for Health Care, 2002 - 2005

Responsible for the medical, mental health, chemical dependency (transiently), and dental care of 15,000 offenders in total confinement. Oversaw an annual operating budget of \$110 million and 700 health care staff.

- As the first incumbent ever in this position, ushered the health services division from an operation of 12 staff in headquarters, providing only consultative services to the Department, to an operation with direct authority and

responsibility for all departmental health care staff and budget. As part of new organizational structure, created and filled statewide positions of Directors of Nursing, Medicine, Dental, Behavioral Health, Mental Health, Psychiatry, Pharmacy, Operations, and Utilization Management.

- Significantly changed the culture of the practice of correctional health care and the morale of staff by a variety of structural and functional changes, including: ensuring that high ethical standards and excellence in clinical practice were of primordial importance during hiring of professional and supervisory staff; supporting disciplining or career counseling of existing staff where appropriate; implementing an organizational structure such that patient care decisions were under the final direct authority of a clinician and were designed to ensure that patient needs were met, while respecting and operating within the confines of a custodial system.
- Improved quality of care by centralizing and standardizing health care operations, including: authoring a new Offender Health Plan defining patient benefits based on the Eighth Amendment, case law, and evidence-based medicine; implementing a novel system of utilization management in medical, dental, and mental health, using the medical staffs as real-time peer reviewers; developing a pharmacy procedures manual and creating a Pharmacy and Therapeutics Committee; achieving initial American Correctional Association accreditation for 13 facilities (all with almost perfect scores on first audit); migrating the eight individual pharmacy databases to a single central database.
- Blunted the growth in health care spending without compromising quality of care by a number of interventions, including: better coordination and centralization of contracting with external vendors, including new statewide contracts for hospitalization, laboratory, drug purchasing, radiology, physician recruitment, and agency nursing; implementing a statewide formulary; issuing quarterly operational reports at the state and facility levels.
- Piloted the following projects: direct issuance of over-the-counter medications on demand through inmates stores (commissary), obviating the need for a practitioner visit and prescription; computerized practitioner order entry (CPOE); pill splitting; ER telemedicine.
- Oversaw the health services team that participated variously in pre-design, design, or build phases of five capital projects to build complete new health units.

NEW YORK STATE DEPARTMENT OF CORRECTIONAL SERVICES

2001 – 2002

Regional Medical Director, Northeast Region, 2001 – 2002

Responsible for clinical oversight of medical services for 14,000 offenders in 14 prisons, including one (already) under court monitoring.

- Oversaw contract with vendor to manage 60-bed regional infirmary and hospice.
- Coordinated activities among the Regional Medical Unit outpatient clinic, the Albany Medical College, and the 13 feeder prisons to provide most of the specialty care for the region.
- Worked with contracting specialists and Emergency Departments to improve access and decrease medical out-trips by increasing the proportion of scheduled and emergency services provided by telemedicine.
- Provided training, advice, and counseling to practitioners and facility health administrators in the region to improve the quality of care delivered.

CORRECTIONAL MEDICAL SERVICES, INC. (now CORIZON)

2000 – 2001

Regional Medical Director, New York Region, 2000 – 2001

Responsible for clinical management of managed care contract with New York State Department of Correctional Services to provide utilization management services for the northeast and northern regions of New York State and supervision of the 60-bed regional infirmary and hospice.

- Migrated the utilization approval function from one of an anonymous rule-based “black box” to a collaborative evidence-based decision making process between the vendor and front-line clinicians.

MERCY INTERNAL MEDICINE, ALBANY, NEW YORK

1999 – 2000

Neighborhood three-physician internal medicine group practice.

Primary Care Physician, 1999 – 2000 (6 months)

Provided direct primary care to a panel of community patients during a period of staff shortage.

ALBANY COUNTY CORRECTIONAL FACILITY, ALBANY, NEW YORK**1998 – 1999**Acting Facility Medical Director, 1998 – 1999

Directed the medical staff of an 800 bed jail and provided direct patient care following the sudden loss of the Medical Director, pending hiring of a permanent replacement. Coordinated care of jail patients in local hospitals. Provided consultation to the Superintendent on improvements to operation and staffing of medical unit and need for privatization.

VETERANS ADMINISTRATION MEDICAL CENTER, ALBANY, NY**1992 – 1998**Assistant Chief, Medical Service, 1995 – 1998Chief, Section of General Internal Medicine and Emergency Services, 1992 – 1998

Responsible for operation of the general internal medicine clinics and the Emergency Department.

- Designed and implemented an organizational and physical plant makeover of the general medicine ambulatory care clinic from an episodic-care driven model with practitioners functioning independently supported by minimal nursing involvement, to a continuity-of-care model with integrated physician/mid-level practitioner/registered nurse/licensed practice nurse/practice manager teams.
- Led the design and opening of a new Emergency Department.
- As the VA Section Chief of Albany Medical College's Division of General Internal Medicine, coordinated academic activities of the Division at the VA, including oversight of, and direct teaching in, ambulatory care and inpatient internal medicine rotations for medical students, residents, and fellows. Incorporated medical residents as part of the general internal medicine clinics. Awarded \$786,000 Veterans Administration grant ("PRIME I") over four years for development and operation of educational programs for medicine residents and students in allied health professions (management, pharmacy, social work, physician extenders) wishing to study primary care delivery.

ERIE COUNTY HEALTH DEPARTMENT, BUFFALO, NY**1988 – 1990**Director of Sexually Transmitted Diseases (STD) Services, 1989 – 1990Staff Physician, STD Clinic, 1988 – 1989Staff Physician, Lackawanna Community Health Center, 1988 – 1990

Provided leadership and patient care services in the evaluation and treatment of STDs. Successfully reorganized the county's STD services which were suffering from mismanagement and were under public scrutiny. Provided direct patient care services in primary care clinic for underserved neighborhood.

UNION OCCUPATIONAL HEALTH CENTER, BUFFALO, NY**1988 – 1990**Staff Physician, 1988 – 1990

Provided direct patient care for the evaluation of occupationally-related health disorders.

VETERANS ADMINISTRATION MEDICAL CENTER, BUFFALO, NY**1985 – 1990**Chief Outpatient Medical Section and Primary Care Clinic, 1986 – 1988VA Section Head, Division of General Internal Medicine, University of Buffalo, 1986 – 1988

- Developed and implemented a major restructuring of the general medicine ambulatory care clinic to reduce fragmentation of care by introduction of a continuity-of-care model with a physician/nurse team approach.

Medical Director, Anticoagulation Clinic 1986 – 1990Staff Physician, Emergency Department, 1985 – 1986**FACULTY APPOINTMENTS**

2020 – present	Faculty Associate, Center for Human Rights, University of Washington
2007 – present	Affiliate Assistant Professor, Department of Health Services, School of Public Health, University of Washington
1999 – present	Clinical Professor, Fellowship in Applied Public Health (previously Volunteer Faculty, Preventive Medicine Residency), University at Albany School of Public Health
1996 – 2002	Volunteer Faculty, Office of the Dean of Students, University at Albany

1992 – 2002	Associate Clinical/Associate/Assistant Professor of Medicine, Albany Medical College
1993 – 1997	Clinical Associate Faculty, Graduate Program in Nursing, Sage Graduate School
1990 – 1992	Instructor of Medicine, Indiana University
1985 – 1990	Clinical Assistant Professor of Medicine, University of Buffalo
1982 – 1985	Clinical Assistant Instructor of Medicine, University of Buffalo

OTHER PROFESSIONAL ACTIVITIES

2016 – present	Chair, Education Committee, Academic Consortium on Criminal Justice Health
2016 – present	Washington State Institutional Review Board (“Prisoner Advocate” member)
2016 – 2017	Mortality Reduction Workgroup, American Jail Association
2013 – present	Conference Planning Committee – Medical/Mental Health Track, American Jail Association
2013 – 2016	“Health in Prisons” course, Bloomberg School of Public Health, Johns Hopkins University/International Committee of the Red Cross
2013 – present	Institutional Review Board, University of Washington (“Prisoner Advocate” member),
2011 – 2012	Education Committee, National Commission on Correctional Health Care
2007 – present	National Advisory Committee, COCHS (Community–Oriented Correctional Health Services)
2004 – 2006	Fellow’s Advisory Committee, University of Washington Robert Wood Johnson Clinical Scholar Program
2004	External Expert Panel to the Surgeon General on the “Call to Action on Correctional Health Care”
2003 – present	Faculty Instructor, Critical Appraisal of the Literature Course, Family Practice Residency Program, Providence St. Peter Hospital, Olympia, Washington
2001 – present	Chair/Co-Chair, Education Committee, American College of Correctional Physicians
1999 – present	Critical Appraisal of the Literature Course, Preventive Medicine Residency Program, New York State Department of Health/University at Albany School of Public Health
1999	Co–Chairperson, Education Subcommittee, Workshop Submission Review Committee, Annual Meeting, Society of General Internal Medicine
1997 – 1998	Northeast US Representative, National Association of VA Ambulatory Managers
1996 – 2002	Faculty Mentor, Journal Club, Internal Medicine Residency Program, Albany Medical College
1996 – 2002	Faculty Advisor and Medical Control, 5 Quad Volunteer Ambulance Service, University at Albany
1995 – 1998	Preceptor, MBA Internship, Union College
1995	Quality Assurance/Patient Satisfaction Subcommittee, VA National Curriculum Development Committee for Implementation of Primary Care Practices, Veterans Administration
1994 – 1998	Residency Advisory Committee, Preventive Medicine Residency, New York State Department of Health/School of Public Health, University at Albany
1993	Chairperson, Dean’s Task Force on Primary Care, Albany Medical College
1993	Task Group to develop curriculum for Comprehensive Care Case Study Course for Years 1 through 4, Albany Medical College
1988 – 1989	Teaching Effectiveness Program for New Housestaff, Graduate Medical Dental Education Consortium of Buffalo
1987 – 1990	Human Studies Review Committee, School of Allied Health Professions, University of Buffalo
1987 – 1989	Chairman, Subcommittee on Hospital Management Issues and Member, Subcommittee on Teaching of Ad Hoc Committee to Plan Incoming Residents Training Week, Graduate Medical Dental Education Consortium of Buffalo
1987 – 1988	Dean’s Ad Hoc Committee to Reorganize “Introduction to Clinical Medicine” Course
1987	Preceptor, Nurse Practitioner Training Program, School of Nursing, University of Buffalo
1986 – 1988	Course Coordinator, Simulation Models Section of Physical Diagnosis Course, University of Buffalo
1986 – 1988	Chairman, Service Chiefs’ Continuity of Care Task Force, Veterans Administration Medical Center, Buffalo, New York
1979 – 1980	Laboratory Teaching Assistant in Gross Anatomy, Université Libre de Bruxelles, Brussels, Belgium

1973 – 1975 Instructor and Instructor Trainer of First Aid, American National Red Cross

1972 – 1975 Chief of Service or Assistant Chief of Operations, 5 Quad Volunteer Ambulance Service, University at Albany.

1972 – 1975 Emergency Medical Technician Instructor and Course Coordinator, New York State Department of Health, Bureau of Emergency Medical Services

REVIEWER/EDITOR

2019 – present Criminal Justice Review (reviewer)

2015 – present PLOS ONE (reviewer)

2015 – present Founding Editorial Board Member and Reviewer, Journal for Evidence-based Practice in Correctional Health, Center for Correctional Health Networks, University of Connecticut

2011 – present American Journal of Public Health (reviewer)

2010 – present International Advisory Board Member and Reviewer, International Journal of Prison Health

2010 – present Langeloth Foundation (grant reviewer)

2001 – present Reviewer and Editorial Board Member (2009 – present), Journal of Correctional Health Care

2001 – 2004 Journal of General Internal Medicine (reviewer)

1996 Abstract Committee, Health Services Research Subcommittee, Annual Meeting, Society of General Internal Medicine (reviewer)

1990 – 1992 Medical Care (reviewer)

EDUCATION

University at Albany, College of Arts and Sciences, Albany; B.S., 1975 (Biology)

EXHIBIT 7

**DECLARATION OF PROFESSOR JUDITH RESNIK REGARDING
ENLARGEMENT AND THE USE OF PROVISIONAL REMEDIES
FOR DETAINED INDIVIDUALS**

I have been asked to make this declaration to explain my understanding of the remedies, both provisional and permanent, that federal judges can provide to people who are incarcerated and facing the threat of COVID-19. Because I have practiced in the federal courts for decades and represented prisoners in federal court, I have had personal experience with the use of enlargement in habeas corpus cases. Given that this provisional remedy is not regularly discussed in reported decisions or in academic analyses, I believe that my experiences and knowledge can be useful to the Court. This opinion is mine and is not that of the institutions with which I am affiliated. I declare that the following is a true and accurate account of my own work as a lawyer, of the pertinent legal principles as I understand them, and of how these precepts can apply in this unprecedented context.

My Background

1. I have worked on occasion as a lawyer, including in the clinical programs at Yale Law School and at the University of Southern California Law Center (USC), where I taught for more than a decade before returning to Yale Law School. I have appeared before the United States Supreme Court and in federal district and appellate courts. I have also been appointed by federal judges to assist in issues arising in large-scale litigation. Below, I provide a few aspects of my work particularly relevant to this declaration. I attach my resume as Exhibit A to this Declaration.

2. From 1977 until 1980, I was a supervising attorney at Yale Law School's clinical program, which then provided legal services to federal prisoners housed at F.C.I. Danbury. From 1980 to 1996, I taught at USC in both traditional classroom and clinical settings.

3. I am now the Arthur Liman Professor of Law at Yale Law School where I teach courses, including on federal and state

courts; procedure; large-scale litigation; federalism; and incarceration.

4. I have taught law for decades. Much of my focus has been on the role and function of courts, and the relationship of governments to their populations. I regularly teach the class entitled Federal and State Courts in the Federal System. Readings for students include materials on habeas corpus and on civil rights litigation.

5. In 2018, I was awarded an Andrew Carnegie Fellowship to work on a book, tentatively entitled *Impermissible Punishments*, which explores the impact of the 1960s civil rights revolution on the kinds of punishments that governments can impose on people convicted of crimes. Central to this book is the role that access to courts played for people held in detention.

6. I am the Founding Director of the Arthur Liman Center for Public Interest Law. The Liman Center teaches classes yearly, convenes colloquia, does research projects, supports graduates of Yale Law School to work for one year in public interest organizations, and is an umbrella for undergraduate fellowships at eight institutions of higher education.

7. I write about the federal courts; adjudication and alternatives such as arbitration; habeas corpus and incarceration; class actions and multi-district litigation; the judicial role and courts' remedies; gender and equality; and about transnational aspects of these issues. In recent years, I have spent a good deal of time doing research related to prisons. I have helped to develop a series of reports that provide information nation-wide on the use of solitary confinement.

8. In February of 2019, I testified before the U.S. Commission on Civil Rights at its hearing on women in prison and co-authored a statement related to the isolation of many facilities for women, their needs for education and work training, and the discipline to which they are subjected. See Statement submitted for the record, *Women in Prison: Seeking Justice Behind Bars*, before the U.S. Commission on Civil Rights, March 22, 2019. The report, published a few months ago, references this testimony. See U.S. Commission on Civil Rights, *Women in Prison: Seeking Justice Behind Bars* (February 2020), available at <https://www.usccr.gov/pubs/2020/02-26-Women-in-Prison.pdf>.

**Remedies Available in the Federal Courts:
Habeas Corpus, Civil Rights Litigation, and Enlargement**

9. In light of my knowledge of the federal law of habeas corpus, state and federal court relations, procedure, and remedies, I have been asked by counsel for the petitioners/plaintiffs to address the range of responses available to judges presiding in cases that raise claims related to COVID-19. I have submitted a declaration akin to this one in a few other cases.

10. As I understand from public materials on the health risks of this disease, COVID-19 poses a deadly threat to the well-being and lives of people who contract this disease. To reduce the risk and spread of this disease, our governments have instructed us to stay distant from others and to take measures that are extraordinary departures from our daily lives and routines.

11. Applying these urgent medical directives to prisons poses challenges in every jurisdiction. Governing legal principles about prisoners' access to courts were not framed to address COVID-19's reality: that being inside prisons that are densely populated can put large numbers of people (prisoners and staff) at risk of immediate serious illness and potential death.

12. These unprecedented risks from and harms of COVID-19 in prison raise a new legal question: whether COVID-19 has turned sentences which, when imposed, were (or may have been) constitutional into unconstitutional sentences during the pendency of this crisis.

13. When sentencing people to a term of years of incarceration, judges had no authority to impose putting a person at grave risk of serious illness and death as part of the punishment for the offense. Now, such grave risks and harms can arise from the fact of incarceration.

14. A recent Supreme Court case, *Montgomery v. Louisiana*, 136 S.Ct. 718 (2016), provides an analogous situation of sentence that was constitutional at sentencing but unconstitutional now. The Court determined that, in light of new understandings of the limits of brain development in juveniles, sentences of life without parole (LWOP) imposed on individuals who had committed crimes when under the age of eighteen were lawful when issued but became unconstitutional. As a consequence, parole boards or courts had to reconsider whether LWOP remained appropriate. COVID-19 raises a parallel question, as it requires courts to address whether

sentences lawful at imposition can (at least temporarily) no longer be served in prisons because otherwise, the sentence would become an unconstitutional form of punishment. In these abnormal times, the speed at which decisions are made is critical. Therefore, as I discuss below, provisional remedies (enabling enlargement and release for some individuals and de-densifying for others) are necessary.

15. The classic and longstanding remedy for relief from unconstitutional detention, conviction, and sentences is habeas corpus. The Constitution enshrined the remedy of habeas corpus, which has a substantial common law history and is codified in federal statutes. *See generally* Paul D. Halliday, *Habeas Corpus* (Harvard U. Press, 2012); Amanda L. Tyler, *Habeas Corpus in Wartime* (Oxford U. Press, 2017); Randy Hertz and James Liebman, *Federal Habeas Corpus Practice and Procedure* (2 volumes, 2019); Hart & Wechsler, *The Federal Courts and the Federal System*, Chapter XI, 1193-1164 (Richard H. Fallon, Jr, John F. Manning, Daniel J. Meltzer & David Shapiro, 7th ed., 2015). These citations are the tip of a vast and substantial literature that aims to understand the history and law of habeas corpus.

The Legal Thicket

16. As is familiar, in federal courts, federal petitioners file under 28 U.S.C. §2255 (post-conviction motions) and under §2241 (the general habeas statute), both of which are civil actions.

17. For example, when I worked at Yale Law School in its clinical program in the late 1970s, we filed lawsuits for federal prisoners predicated on 28 U.S.C. §2241 as well as (in appropriate situations) on 28 U.S.C. §1331 (general question jurisdiction) and 28 U.S.C. §1361 (mandamus), and in several instances, we filed cases as class actions. In the mid-1970s, the Supreme Court provided rules and forms for §2254 and §2255 filings. The Federal Rules of Civil Procedure supplement those rules, as recognized in F.R.Civ.Pro. 81(a)(4).

18. Congress has recognized that federal judges are authorized under the habeas statutes to "summarily hear and determine the facts, and dispose of the matter as law and justice require." *See* 28 U.S.C. §2243. In addition to this statutory authority, federal judicial power is predicated on the constitutional protection of the writ and on the common law.

19. Congress has channeled and circumscribed some of federal judicial authority through the Antiterrorism and Effective Death Penalty Act of 1996 (AEDPA) and, relatedly, under the Prison Litigation Reform Act (PLRA) of 1996.

20. Moreover, the Supreme Court has issued many decisions interpreting the prior habeas statutes, the 1996 revisions in AEDPA, and the intersection of habeas and civil rights claims brought under 42 U.S.C. §1983. The result is a dense arena of law and doctrine that can be daunting for litigants and jurists alike.

21. Some Supreme Court decisions, written to address claims by state prisoners, have delineated litigation focused on the fact or duration of confinement, for which release is the remedy and habeas is the preferred route, from challenges to conditions of confinement, for which the Court has required use of 42 U.S.C. §1983. See, e.g., *Preiser v. Rodriguez*, 411 U.S. 475 (1978); *Heck v. Humphrey*, 512 U.S. 477 (1994). Yet that distinction is hard to apply, and many opinions have identified that the overlap, as exemplified by *Mohammad v. Close*, 540 U.S. 744 (2004), *Wilkinson v. Dotson*, 544 U.S. 74 (2005), and by other Supreme Court and lower court decisions.

22. COVID-19 poses a new and painful context in which to undertake that analysis. Some reported decisions addressing the constitutional right of prisoners that officials not be "deliberately indifferent to serious medical needs" consider those Eighth Amendment claims to be appropriate for §1983 because they relate to conditions. But this deadly disease turns ordinary conditions into potentially lethal threats of illness for which the remedy to consider is release of at least some prisoners because density puts people at medical risk.

23. Because COVID-19 can end people's lives unexpectedly and abruptly, COVID-19 claims turn the condition of being incarcerated into a practice that affects the fact or duration of confinement. In my view, COVID-19 claims, therefore, collapse the utility and purpose of drawing distinctions between what once could more coherently be distinguished.

24. Courts need also to consider how COVID-19 fits (or not) with provisions of AEDPA and the parameters of the PLRA. Again, new problems have emerged. For example, in some contexts for state and federal prisoners, a question of exhaustion of remedies arises. Often one issue is the ability of the executive branch to respond

quickly. In the COVID context, day by day, the risk of illness increases for prisoners and staff, which endanger health care resources. Exhaustion would be "futile" if other branches of government are not prompt in response and if people become sick, risks skyrocket, and deaths occur.

25. "Futility" thus needs to be analyzed in terms not only of the capacity of institutions but in terms of the likelihood that the people seeking relief will be well enough to have the capacity to do so, and that the remedy provided will be effective given the alleged harm.

26. Other legal issues include when class actions or other forms of multi-party treatment are appropriate and if so, whether the criteria such as those of Rule 23 are met; the merits of arguments about unconstitutional sentences and conditions; and the range of remedies. Furthermore, circuit case law varies somewhat on the use and application of the Federal Rules of Civil Procedure in habeas filings and on the scope and the interpretation of 28 U.S.C. §2241.

The Availability of Provisional Remedies

27. The reason to flag some of the many issues that litigation of both habeas petitions and civil rights cases entail is to underscore the importance of considering provisional remedies when cases are pending. In general, time is required for lawyers to brief and for judges to interpret and apply the law. But waiting days in a world of COVID infections can result in the loss of life.

28. While courts have not faced COVID before, they have faced urgent situations, which is why provisional legal remedies exist. Courts have two ways to preserve the *status quo* - which here means protecting to the extent possible the health of prisoners, staff, and providers of medical services. One route is the use of temporary restraining orders and preliminary injunctions. These remedies require no explanation because they are familiar procedures. See Fed. R. Civ. Pro. 65.

29. Another option is an aspect of federal judicial power that is less well known. District courts have authority when habeas petitions are pending to "enlarge" the custody of petitioners. "Enlargement" is a term that, as far as I am aware, is used only in the context of habeas. (More familiar terms for individuals permitted to leave detention are "release" and "bail," and some

decision that "enlarge" petitioners use those words rather than enlargement).

30. The distinction is that enlargement is not release. The person remains *in custody* - even as the place of custody is changed and thus "enlarged" from a particular prison to a hospital, half-way house, a person's home, or other setting. Enlargement is a provisional remedy that modifies custody by expanding the site in which it takes place.

31. Enlargement has special relevance when the PLRA has application. As I understand the PLRA's rules on the "release" of prisoners, enlargement would not apply, as enlargement is not a release order. And, of course, interpreting the many directives of the PLRA in light of COVID entails more elaboration than my comments here.

32. The need to work through that statute and case law is another reason why the availability of provisional remedies is so important. Enlargement provides an opportunity for increasing the safety of prisoners, staff, and their communities while judges consider a myriad of complex legal questions.

33. I first encountered the provisional remedy of enlargement in the 1970s, when I represented a prisoner - Robert Drayton - who was confined at F.C.I. Danbury and who filed a habeas petition alleging that the U.S. Parole Commission had unconstitutionally rescinded his parole.

34. The Honorable T.F. Gilroy Daly, a federal judge sitting in the District of Connecticut, granted Mr. Drayton's request for enlargement while the decision on the merits was pending. Mr. Drayton returned to his home in Philadelphia and came back to Connecticut for the merits hearing. Judge Daly thereafter ruled in his favor; that decision was upheld in part and reversed in part. *See Drayton v. U.S. Parole Commission*, 445 F. Supp. 305 (D. Conn. 1978), *affirmed in part, Drayton v. McCall*, 584 F.2d 1208 (2d Cir. 1978).

35. Judge Daly did not write a decision explaining the enlargement. Given that I knew that the use of enlargement was not always recorded in published decisions and that enlargement had special relevance here, I decided I should learn more about other courts' discussion of this provisional remedy.

36. The provisional district court remedy of enlargement is not mentioned directly in federal rules governing the lower

federal courts. In contrast, at the appellate level, Federal Rule of Appellate Procedure (FRAP) 23 provides in part that:

While a decision not to release a prisoner is under review, the court or judge rendering the decision, or the court of appeals, or the Supreme Court, or a judge or justice of either court, may order that the prisoner be: (1) detained in the custody from which release is sought; (2) detained in other appropriate custody; or (3) released on personal recognizance, with or without surety. While a decision ordering the release of a prisoner is under review, the prisoner must - unless the court or judge rendering the decision, or the court of appeals, or the Supreme Court, or a judge or justice of either court orders otherwise - be released on personal recognizance, with or without surety.

As that excerpt reflects, the Rule uses language familiar in the context of bail and provides that appellate courts may also determine that a petitioner be detained in "other appropriate custody."

37. Federal courts at all level are authorized by Congress to decide habeas cases "as law and justice requires." 28 U.S.C. §2243. The case law also references that, at the district court level, the authority to release a habeas petitioner pending a ruling on the merits stems from courts' inherent powers. See, e.g., *Mapp v. Reno*, 241 F.3d 221, 226 (2d Cir. 2001). And, as I noted, in these reported decisions, the terms "bail" or "release" are sometimes used instead of or in addition to "enlargement."

38. In the last weeks, the saliency of enlargement has prompted me to review more of the law surrounding it. To gather materials and opinions on enlargement, I asked two law students, Kelsey Stimson of Yale Law School and Ally Daniels of Stanford Law School, to help me research what judges have said about enlargement and what others have written. Below I detail some of the governing case law. The Hertz & Liebman *Treatise on Habeas* also has a section (§14.2) devoted to this issue.

39. Some of the decisions involve requests for release when habeas petitions were pending from state prisoners, and others from federal prisoners, or from people in immigration detention. Further, several appellate cases address the issue of whether a district court order on enlargement was appealable as of right or subject to mandamus.

40. My central point is that, amidst these various debates about appealability and the test for enlargement/release, most circuits have recognized that district courts have the authority to order release pending final disposition of a habeas petition. See e.g., *Woodcock v. Donnelly*, 470 F.2d 93, 43 (1st Cir. 1972); *Mapp v. Reno*, 241 F.3d 221, 226 (2d Cir. 2001); *Landano v. Rafferty*, 970 F.2d 1230, 1239 (3d Cir. 1992); *Calley v. Callaway*, 496 F.2d 701, 702 (5th Cir. 1974); *Dotson v. Clark*, 900 F.2d 77, 79 (6th Cir. 1990); *Cherek v. United States*, 767 F.2d 335, 337 (7th Cir. 1985); *Martin v. Solem*, 801 F.2d 324, 329 (8th Cir. 1986); *Pfaff v. Wells*, 648 F.2d 689, 693 (10th Cir. 1981); *Baker v. Sard*, 420 F.2d 1342, 1342-44 (D.C. Cir. 1969).

41. The Fourth and Eleventh Circuits appear, albeit less directly, to recognize enlargement authority. See *Gomez v. United States*, 899 F.2d 1124, 1125 (11th Cir. 1990); *United States v. Perkins*, 53 F. App'x 667, 669 (4th Cir. 2002). A Ninth Circuit opinion from 1989 likewise appears to recognize the power of district courts to grant release pending a habeas decision where there are "special circumstances or a high probability of success." See *Land v. Deeds*, 878 F.2d 318 (9th Cir. 1989). Thereafter, another decision, *In re Roe*, described the Circuit as not having ruled on the issue in terms of state prisoners. See 257 F.3d 1077 (9th Cir. 2001).¹

42. A discrete question is the standard for enlarging petitioners. To obtain an order for release pending the merits of habeas decision, the petitioner must demonstrate "extraordinary circumstances" and that the underlying claim raises "substantial claims." See e.g. *Mapp v. Reno*, 241 F.3d 221, 226 (2d Cir. 2001). Courts have also discussed that release is appropriate when "necessary to make the habeas remedy effective." *Mapp*, 241 F.3d at 226; see also *Landano v. Rafferty*, 970 F.2d 1230, 1239 (3d Cir. 1992). As that Third Circuit decision explained, release was "available 'only when the petitioner has raised substantial constitutional claims upon which he has a high probability of success, and also when extraordinary or exceptional circumstances

¹ Subsequent lower court cases debated whether district courts do possess such authority. See, e.g., *Hall v. San Francisco Sup. Ct.*, 2010 WL 890044, at *2 (N.D. Cal. Mar. 8, 2010) ("Based on the overwhelming authority [of other circuit courts] in support, the court concludes for purposes of the instant motion that it has the authority to release Hall pending a decision on the merits."); *United States v. Carreira*, 2016 U.S. Dist. LEXIS 31210, at *4, (D. Haw. Mar. 10, 2016) ("[T]his Court declines to address the merits of Petitioner's bail requests in the absence of definitive guidance from the Ninth Circuit regarding the scope of this Court's bail authority.").

exist which make the grant of bail necessary to make the habeas remedy effective.'"

43. Some judges have interpreted the "substantial questions" prong to require the underlying claim to have a "high probability of success." See *Hall v. San Francisco Superior Court*, No. C 09-5299 PJH, 2010 WL 890044, *1 (N.D. Cal. Mar. 8, 2010); *In re Souels*, 688 F. App'x 134, 135 (3d Cir. 2017). That test resembles standards for preliminary injunctive relief and for stays, which include an assessment of the likelihood of success on the merits and of whether the balance of hardships tips in favor of altering the status quo. (And, of course, more can be said about the nuances of these bodies of law as well.)

44. A few cases focus on the health of a petitioner as central to the conclusion that "extraordinary circumstances" exist. For example, in *Johnston v. Marsh*, the petitioner, Alfred Ackerman, brought a habeas claim alleging that he was convicted in Pennsylvania through a trial that lacked "due process." 227 F.2d 528 (3d Cir. 1955). Ackerman asked for release pending a decision on the merits of his habeas petition; he argued that he had advanced diabetes and was "rapidly progressing towards total blindness." *Id.* at 529. The district court authorized Ackerman to be released to a private hospital. The prison warden (Frank Johnston) went to the Third Circuit invoking sought writs of prohibition and mandamus to order the district court (Judge Marsh) to change his ruling. Rejecting the petitions, the Third Circuit affirmed that district courts possessed the authority to order relocation while the habeas petition was pending. *Johnson v. Marsh* has been cited in more recent cases to illustrate that findings of extraordinary circumstances may "be limited to situations involving poor health or the impending completion of the prisoner's sentence." *Landano*, 970 F.2d at 1239.

45. The court in *In re Souels* addressed what showing of health problems constituted extraordinary circumstances. See 688 F. App'x at 135-36. Sean Souels, who was serving a 46-month federal prison sentence, petitioned for a writ of mandamus directing the court to rule on his writ of habeas corpus and sought release pending the decision. *Id.* at 134. The court denied Souels bail because "he [did] not describe his medical conditions in any detail or explain how he cannot manage his health issues while he is in prison." *Id.*

46. Health is not the only extraordinary circumstance that has been the basis for enlargement. For example, in *United States v. Josiah*, William Josiah brought a writ of habeas corpus after

the Supreme Court invalidated the residual clause of the Armed Career Criminal Act (ACCA) and altered the method for determining whether prior convictions qualify as violent felonies under the ACCA. 2016 WL 1328101, at *2 (D. Haw. Apr. 5, 2016). Josiah, who was serving a federal prison sentence argued that his prior convictions did not qualify as violent felonies and that he should not be subject to the fifteen-year mandatory minimum. The district court concluded that because the issue of retroactivity was pending before the Supreme Court and Josiah would have served his full sentence if the Court held its prior ruling retroactive, release pending the higher court's ruling was appropriate. *Id.* at *4-6.

47. In circumstances similar to *Josiah*, a district judge sitting in the Central District of Illinois issued three orders granting release, termed bail, to petitioners pending resolution of their habeas claims. See *Zollicoffer v. United States*, No. 15-03337, 2017 WL 79636 (C.D. Ill. Jan. 9, 2017); *United States v. Jordan*, No. 04-20008, 2016 WL 6634852 (C.D. Ill. Nov. 9, 2016); *Swanson v. United States*, No. 15-03262, 2016 WL 5422048 (C.D. Ill. Sept. 28, 2016).

48. Another case involved enlargement in the context of the military. See *Gengler v. U.S. through its Dep't of Def. & Navy*, 2006 WL 3210020, at *6 (E.D. Cal. Nov. 3, 2006). As that court explained, a "district court has the inherent power to enlarge a petitioner on bond pending hearing and decision on his petition for writ of habeas corpus." *Id.* at *5. The judge also noted that a "greater showing must be made by a petitioner seeking bail in a criminal conviction habeas 'than would be required in a case where applicant had sought to attack by writ of habeas corpus an incarceration not resulting from a judicial determination of guilt.'" The court used the test of "exceptional circumstances and, at a minimum, substantial questions as to the merits." *Id.* at 13. The court found "exceptional circumstances" based on the fact that the petitioner had been admitted to business school, had been granted permission by his commanding officer to attend, and would be forced to drop out if his custody were not enlarged. The court also ruled that "substantial questions as to the merits" existed because of alleged government errors in drafting the petitioner's service agreement. *Id.* at *6.

49. As of this writing, a few reported cases discuss COVID-based requests for enlargement while a habeas corpus proceeding is pending. In addition, many decisions address requests for release under federal statutes as well as other remedies.

50. Given the fast pace of litigation and the many concerns about people's well-being, UCLA has created a website that is regularly updated and compiles materials and decisions related to COVID. See UCLA Law Covid-19 Behind Bars Data Project, available at https://docs.google.com/spreadsheets/d/1X6uJkXXS-06eePLxw2e4JeRtM4luPZ2eRcOA_HkPVTk/edit#gid=708926660.

51. Below I provide a few illustrations of decisions since April that are related to COVID and enlargement.

52. On April 7, the Honorable Jesse Furman, sitting in the Southern District of New York, granted on consent a motion styled "for bail" (the term used in the Second Circuit *Mapp* decision). Judge Furman ordered immediate release under specified conditions, pending the adjudication of the Section 2255 Motion. See *United States v. Nkanga*, No. 18-CR-00730 (S.D.N.Y., Apr. 7, 2020).

53. A second case involves a class action filed by Craig Wilson and others. See *Wilson v. Williams*, No. 4:20-cv-00794-JG, 2020 WL 1940882, at *1 (N.D. Ohio Apr. 22, 2020). Seeking to represent a class of all current and future prisoners of the Elkton Federal Correctional Institution (FCI) and a subclass of the medically vulnerable population, they sought relief because their continued incarceration subjected all FCI prisoners to substantial risk of harm in violation of the Eighth Amendment.

54. On April 22, 2020, the federal district court granted in part the request by the *Wilson* class for emergency relief, which included enlargement of a subclass of prisoners challenging the manner in which the sentence was served and hence cognizable as a habeas petition. See *Wilson v. Williams*, No. 4:20-cv-00794-JG, 2020 WL 1940882 (N.D. Ohio Apr. 22, 2020). The Sixth Circuit denied a stay soon thereafter. See *Wilson v. Williams*, No. 4:20-CV-00794, 2020 WL 2308441, at *1 (6th Cir. May 8, 2020).

55. The *Wilson* case also cited to *Money v. Pritzker*, No. 1-20 CV 02094, 2020 WL 1920660, at *1 (N.D. Ill. April 10, 2020), a class action seeking relief on behalf of state prisoners, and the *Wilson* court referenced that I had also submitted a declaration similar to this one in that action. In *Money*, I discussed enlargement as well as the interaction between civil rights litigation and habeas corpus. *Id.* at *8-9. The Honorable Robert M. Dow, Jr. invoked my discussion, and the court determined not to grant the emergency relief sought by the plaintiff class. *Id.*

56. On May 12, 2020, the Honorable Michael Shea issued another decision responding to a petition challenging treatment of

prisoners at three facilities that compromise FCI Danbury. In *Martinez-Brooks v. Easter*, 3-20-cv-00569-MPS, 2020 WL 2405350 (D. Conn., May 12, 2020). Judge Shea granted in part the request for a temporary restraining order and required "the Warden at FCI Danbury to adopt a process for evaluating inmates with COVID-19 risk factors for home confinement and other forms of release that is both far more accelerated and more clearly focused on the critical issues of inmate and public safety than the current process." *Id.* at *1. He also ordered expedited discovery and scheduled a June hearing on the request for a preliminary injunction. *Id.* In that opinion, Judge Shea discussed enlargement as he analyzed the relief sought by the petitioners. *Id.* at *2

57. Another case has less relevance as it was brought by an unrepresented litigant, Richard Peterson, who had originally sought habeas corpus relief on a claim about education credits and then filed an emergency request for release from a California state prison due to COVID-19. *Peterson v. Diaz*, No. 2:19-CV-01480, 2020 WL 1640008, at *1 (E.D. Cal. Apr. 2, 2020). The district court noted that a class action raising COVID claims was pending in another federal court in California and that, while the court had the authority to release a person while a habeas petition was pending, Mr. Peterson had not provided evidence sufficient to meet the test to do so. *Id.*

Conclusion

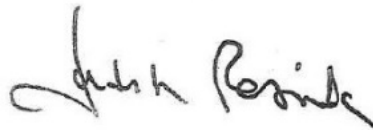

58. In sum, COVID-19 is an unprecedented event that, in my view, raises the legal question of whether, in light of the government mandates for social distancing, sentences (that had been lawful when they were imposed) cannot lawfully be served when the setting puts an individual in a position of untenable risk. Thus, habeas corpus - which addresses the constitutionality of sentences and offers the possibility of release and enlargement - properly provides a jurisdictional basis and remedies for this situation.

59. I need also to note that, in recent years, the Supreme Court has raised questions in many contexts about the remedial powers of federal judges. Whether the topic is nationwide injunctions or commercial contracts, debates have occurred within the Court about the authority of federal judges.

60. Those cases do not address the extraordinary and painful moment in which we are all living. Ordinary life has been up-ended in an effort to keep as many people as possible alive and not

debilitated by serious illness. Moreover, the Supreme Court opinions have not focused on the relevance of those remedial debates to situations where confinement can put entire staffs and detained populations at mortal risk. Therefore, judges have the obligation and the authority to interpret statutes and the Constitution to preserve the lives of people living in and working in prisons. It is my hope that this account of earlier uses of enlargement and the dense account of case law and doctrine will be of service to this Court and to the parties in understanding the meaning and import of American law.

Employment

Arthur Liman Professor of Law, Yale Law School, 1997-present
Founding Director, Arthur Liman Center for Public Interest Law
Honorary Visiting Professor, University College London
Faculty of Law, 2009-2021
Visiting Professor, Dauphine Université Paris, March 2016
Visiting Professor, Université Panthéon-Assas Paris II, May 2015
Convening Professor, Constituting Federalism, a seminar for the Institute for
Constitutional History in conjunction with the New York Historical
Society, February 2014
Scholar in Residence, Columbia Law School, Spring 2011; 2012
Distinguished Visiting Professor, University of Toronto School of Law, 2005
Parsons Visitor, Sydney University School of Law, 2004

Visiting Professor, New York University School of Law, 1996-1997
Visiting Professor, Harvard Law School, Fall 1989
Visiting Professor, Yale Law School, Spring 1989
Visiting Professor, University of Chicago Law School, Fall 1988

Orrin B. Evans Professor of Law, University of Southern California, 1989-1997;
Professor of Law: 1985-1989; Associate Professor: 1982-1985;
Assistant Professor: 1980-1982
Member, Faculty, The Salzburg Seminar on U.S. Legal Institutions, July 1988

Acting Director, Daniel and Florence Guggenheim Program in Criminal Justice,
Yale Law School, 1979-1980

Lecturer in Law and Supervising Attorney, Yale Law School, 1977-1979

Instructor, New York University School of Law, 1976-1977

Law Clerk, Honorable Charles E. Stewart, United States District Court,
Southern District of New York, 1975-1976

Selected Professional Activities

Chair of Fellows Selection Committee and Founding Director, Arthur Liman Center for
Public Interest Law, Yale Law School, 1997-present

Chair, Yale Law School Global Constitutionalism Seminar, A Part of the Gruber Program for Global Justice and Women's Rights, 2012-present
 Member, Board of Managerial Trustees, International Association of Women Judges, 2001-present
 Chair, Order of the Coif Book Award Committee, 2018-2020
 Fellow, Whitney Humanities Center, 2020-2021
 Chair, American Association of Law Schools, Section on Law and Humanities, 2020
 Chair, American Association of Law Schools, Section on its Sections, 2019-2022
 Advisor, American Law Institute, Project on Sexual and Gender-Based Misconduct on Campus, 2015-present
 Member, Task Force on Federal Judicial Selection, Project on Government Oversight of The Constitution Project, 2019
 Steering Committee, Women Faculty Forum, Yale University, 2001-present
 Co-chair, 2001-2003, 2006-2008
 Co-Chair, Judicial-Academic Network, National Association of Women Judges, 2009-2019, 1998-2001
 Academic Fellow, Pound Civil Justice Institute, 2016-present
 Fellow, Davenport College, Yale University, 2002-present
 Former Chair, Section on Civil Procedure, American Association of Law Schools; 2018, 2003, 1991
 Member, Executive Committee, Section on Federal Courts, American Association of Law Schools, 1999-2004, 2014-present; chair, 2002
 Member, Executive Committee, Section on Law and the Humanities, American Association of Law Schools, 2015-present
 Member, Academic & Scientific Council, The Gender Equality Project, Switzerland, 2009-present
 Advisor, European Law Institute and International Institute for the Unification of Private Law Project, From Transnational Principles to Rules of European Civil Procedure, 2015-2016
 Member, Executive Session, State Courts in the Twenty-First Century, The Kennedy School, Harvard University, 2008-2011
 Member, Advisory Group, Principles of the Law of Aggregate Litigation, American Law Institute, 2004-2009
 Member, Standing Committee on Federal Judicial Improvements, American Bar Association, 2006-2010 (prior three-year term in the late 1990s);
 Chair, Academic Advisory Committee to the Standing Committee on Federal Judicial Improvements, American Bar Association, 2010-2014
 Member, Editorial Board, Yale Journal of Law and Feminism
 Member, Editorial Advisory Board, Yale Journal of Law and the Humanities
 Member, Advisory Board, Journal of Law and Ethics of Human Rights
 Member, Advisory Board, Litigation and Procedure, and Negotiation and Dispute Resolution eJournals (Social Science Research Network, online)
 Member, Advisory Board, Women's Studies Quarterly

Other Activities

Co-chair of the Board, Fansler Foundation, 2003-2014
Member, National Board of Academic Advisors for the William H. Rehnquist Center on the Constitutional Structures of Government, 2007-2009
Member, Advisory Board of the Science for Judges Project, Brooklyn Law School, 2003-2007
Board Member, Lawyers' Committee for Civil Rights, 2004-2007
Liaison, American Association of Law Schools to the American Bar Association Commission on Women, 2000-2005
Member, Advisory Board of the Center for Judicial Process, Albany Law School, 2000-2004
Member, Editorial Board, Law and Social Inquiry, 1998-2004
Member, Committee on Diversity in Legal Education of the Section of Legal Education and Admissions to the Bar of the American Bar Association, 1996-2002
Consultant, RAND, Institute for Civil Justice, 1980-2002
Member, Editorial Board, The Justice System Journal
Member, Board of Governors, Society of American Law Teachers, 1980-1997
Co-Chair, University of Southern California Feminist Council, 1990-1996
Member, Ninth Circuit Gender Bias Task Force, 1990-1994
Co-Chair, Robert M. Cover Memorial Public Interest Retreat, Society of American Law Teachers, 1988-1992
Member of and a general reporter for the International Association of Procedural Law, 1991 Conference
Member, Planning Committee, ABA-AALS Conference on Women in Legal Education, 1990
Member, Advisory Panel to a Subcommittee of the Federal Courts Study Committee, 1989-1990
Member, Steering Committee for the Center for Feminist Research, University of Southern California, 1990-1994
Member, American Bar Association, Litigation Section, Federal Initiatives Task Force, 1991-1993
Chair, Section on Women in Legal Education, American Association of Law Schools, 1989
Member, Twentieth Century Fund Task Force on Judicial Responsibility, 1988-1989
Member, Board of ACLU of Southern California, 1985
Chair, Bryn Mawr College Centennial Campaign for Southern California, 1983-1985

Courses taught at Yale Law School, 1997-2020

Federal and State Courts in the Federal System
Procedure
Equality, Sovereignty and Citizenship (with Prof. Reva Siegel)
Gender: Globally and Locally (with Prof. Vicki Jackson)
Liman Workshops (topics and co-teachers vary yearly)
Rationing Law: Subsidizing Access to Justice in Democracies
Poverty and the Courts: Fines, Fees, Bail, and Collective Redress

Who Pays? Fines, Fees, Bail, and the Cost of Courts
 Imprisoned
 Human Rights, Incarceration, and Criminal Justice Reform
 Moving Criminal Justice: Practices of Reform
 Incarceration
 Borders
 Rationing Law: Constitutional Entitlements to Courts in an
 Era of Fiscal Austerity
 Abolition: Slavery, Supermax, and Social Movements
 Accessing Justice and Rights – From Streets to Prisons
 Community, Confinement, Labor, and Rights
 Equality, Punishment, and Incarceration
 Imprisoned
 Detention
 Federalism and Social Movements: Public Interest Lawyering
 in Cities and States
 Citizenship
 Constitutional Law as Public Interest Law

EXHIBIT 8

DECLARATION OF JIMMY THREATT

I, Jimmy Threatt, declare as follows:

1. I am an active member of the Bar of the State of California and an associate with Bird, Marella, Boxer, Wolpert, Nessim, Drooks, Lincenberg & Rhow, a professional corporation, attorneys of record for Petitioners in this action. Except for those matters stated on information and belief, I make this declaration based upon personal knowledge and, if called upon to do so, I could and would so testify.

2. I have attempted to arrange legal calls with four prisoners incarcerated at FCI Terminal Island who had been identified to my firm by their family members and friends as seeking our representation in this action. I have spoken with only one of them. None of the other calls have been scheduled by the Bureau of Prisons (“BOP”). Attached as **Exhibit A** is a compilation of true and correct copies of my email correspondence with BOP employees.

3. On May 9, 2020, I called the main desk at FCI Terminal Island to schedule a legal call with Lance Wilson, No. 72372-097. No one answered and I was not given the opportunity to leave a voice message.

4. On May 10, 2020, I again called the main desk at FCI Terminal Island to schedule a legal call with Lance Wilson. No one answered and I was not given the opportunity to leave a voice message.

5. Later that day, I emailed the publicly listed email address for FCI Terminal Island to schedule a call with Lance Wilson. I did not receive a response.

6. I then emailed the BOP Legal Department to schedule a call with Lance Wilson.

7. The next day, May 11, Eliezer Ben-Shmuel, an attorney with BOP, responded, instructing me to email the address for FCI Terminal Island that I had contacted on May 9 and 10.

8. Later on May 11, I received a call informing me that my request had been approved and a call with Lance Wilson would be scheduled for a later date.

1 I did not hear anything further until May 14.

2 9. On May 12, I emailed the address for FCI Terminal Island to schedule
3 a legal call with William Sutton, Jr., No. 76176-112.

4 10. The following day, May 13, I called the main desk at FCI Terminal
5 Island to follow up on my request for a call with William Sutton. No one answered
6 and I was not given an opportunity to leave a message.

7 11. At 12:22 A.M. on May 14, I emailed FCI Terminal Island to schedule
8 a legal call with Edgar Vasquez, No. 46907-007.

9 12. At 1:10 A.M. on May 14, I emailed FCI Terminal Island to schedule
10 a legal call with Maurice Smith, No. 24299-298.

11 13. In the afternoon of May 14, I received an email from Jennifer Merkle,
12 an attorney with BOP, informing me that she had been referred thirteen of my
13 requests, which would include all of my requests for calls with prisoners at FCI
14 Lompoc, USP Lompoc, and FCI Terminal Island. She stated she would need to
15 assess every request individually and would be in touch as to each separately.

16 14. Later on May 14, I received a call from an officer at FCI Terminal
17 Island instructing me that he was with prisoner Lance Wilson, who would be
18 permitted to speak with me. I spoke with Mr. Wilson for approximately 15 minutes,
19 during which time he relayed the following information:

- 20 • He has tested positive for COVID-19.
- 21 • He has underlying conditions of asthma and hypertension, for
22 which he is prescribed medication. His symptoms have included
23 body chills and severe migraines. He has not been placed into
24 quarantine or isolated. He also has not received treatment or
25 been granted access to doctors. When he has asked corrections
26 officers for assistance, they have told him they would “call
27 somebody” if he could no longer stand up but otherwise he
28 would not be given any help.

- He has not seen or heard of any prisoners being tested again since the facility-wide testing occurred. He has heard of some prisoners being taken to the hospital. One person in his unit was taken to the hospital after suffering chronic diarrhea and body chills. However, he never came back, so Mr. Wilson does not know what happened to him.
- He has not received a new mask in over two weeks.

15. On May 14, 2020, I received an email from an officer confirming that the requests to schedule calls with prisoners Lance Wilson, William Sutton, and Maurice Smith had been received and instructing me that I should contact him to arrange for legal calls for those prisoners. I responded the same day to notify him that I had also submitted a request for a legal call with Edgar Vasquez. I have not heard back.

16. As I was finalizing this declaration on May 15, I received a second email from Ms. Merkle, asking me to call her so that she and I could “identify [my] specific needs.”

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct, and that I executed this declaration on May 15, 2020, at Los Angeles, California.

Subject: Legal Call with Inmate at FCI Terminal Island

Importance: High

My firm is counsel for Lance Wilson (Inmate No. 72372-097). I have been trying to schedule a call to discuss a legal matter with him. I have twice called to speak with his unit manager but have not heard back.

I would appreciate any assistance you can provide in setting up a call with Mr. Wilson. You can reach me at this email address or on my cell phone,

Thank you.

Mr. Threatt,

All requests for legal calls should be sent to TRM/ExecAssistant@bop.gov.

Please keep in mind that the institution needs to take significant precautions before permitting inmates to make these calls because of the significant potential for transmitting COVID-19 through telephone receivers. As a result, we appreciate your continued patience in setting up these calls.

Subject: Requests for Legal Calls with Clients / Prospective Clients at FCC Lompoc

Good afternoon,

I think you may recall we spoke on the phone about a legal call for inmate Ben the other day. I have now been assigned 13 of your requests to review. It has become apparent that some of the individuals that you seek to have a legal call with are represented by other counsel as to their release options; therefore, I will be assessing each of these requests individually.

In the meantime, please feel free to send any additional request to me directly for review.

I will be in touch as to each request separately.

Thank you,
Jennifer

Mr. Threatt,

Nice to talk with you today, as we discussed both you and your team may contact me to arrange legal calls for the inmates at Terminal Island. Please note in our response to COVID-19 we are running a modified operations schedule and I ask you provide me with a good contact number and as broad a range of time as to when my staff may facilitate the call. In reviewing the general mailbox I note you wish to contact the following inmates:

1. Maurice Smith (Inmate No. 24299-298);
2. Lance Wilson (Inmate No. 72372-097);
3. William Sutton Jr, (Inmate No. 76176-112).

Are there any other inmates you or your need me to make arrangements for?
